Privacy in the 21st Century Alexandra Rengel, 2013-10-02 In *Privacy in the 21st Century* Alexandra Rengel offers an assessment of the international right to privacy within both a historical and modern context. The book explores the underpinnings of privacy in religion, philosophy and the law. The author explores the evolution of the legal concept of the right to privacy and offers a comparative law analysis of the global protections of privacy offered by individual states, international agreements and recognized international legal norms. The author peers into the future of privacy, the technologies which affect the right to privacy and the ways in which privacy may be protected in the future within the domestic and international law contexts. The author offers her insightful views on possible solutions to counteract encroachments on the right to privacy.

Exposed Bernard E. Harcourt, 2015-11-17 Exploiting our boundless desire to access everything all the time, digital technology is breaking down whatever boundaries still exist between the state, the market and the private realm. Bernard Harcourt offers a powerful critique of what he calls the expository society, revealing just how unfree we are becoming and how little we seem to care.

Reloading Data Protection Serge Gutwirth, Ronald Leenes, Paul De Hert, 2013-10-28 This volume brings together papers that offer conceptual analyses, highlight issues, propose solutions and discuss practices regarding privacy and data protection. The first section of the book provides an overview of developments in data protection in different parts of the world. The second section focuses on one of the most captivating innovations of the data protection package: how to forget and the right to be forgotten in a digital world. The third section presents studies on a recurring and still important and much disputed theme of the Computers, Privacy and Data Protection (CPDP) conferences: the surveillance, control and steering of individuals and groups of people and the increasing number of performing tools, data mining, profiling, convergence to achieve those objectives. This part is illustrated by examples from the domain of law enforcement and smart surveillance. The book concludes with five chapters that advance our understanding of the changing nature of privacy concerns and data protection.
