Ai Image Generator Stagram Picks Usa:

Artificial Intelligence, Ethics, and the Digital Society: Pathways to Sustainable Development Anju

Beniwal, 2025-06-25 In recent years the rapid advancement of technology particularly Artificial Intelligence AI and digital innovations has fundamentally transformed every dimension of human society These developments have not only reshaped our economies and lifestyles but have also raised critical ethical environmental and sociological questions This edited volume brings together a diverse range of scholarly contributions that explore the intersections between technological progress sustainable development and social well being The chapters included in this volume reflect contributions from scholars and researchers across India encompassing disciplines such as Sociology History Economics Political Science and Liberal Education The themes range from the role of AI in everyday life and the impact of smart cities on environmental management to localized frameworks of sustainability the digital transformation of food systems and the media's influence on social awareness campaigns Special emphasis is placed on how Artificial Intelligence and digital technologies can both aid and challenge the achievement of Sustainable Development Goals SDGs Simultaneously the ethical frameworks surrounding these innovations are explored to ensure technology serves humanity without compromising core societal values This book also examines grassroots realities and region specific concerns such as sustainable practices in Assam the digitalization of India's organic food sector and menstrual taboos across cultures providing an inclusive and grounded understanding of the diverse sociocultural contexts in which sustainability must be achieved I hope that this volume serves not only as a valuable academic resource but also as a catalyst for interdisciplinary dialogue and policy innovation It is my belief that such collaborative and ethical inquiry is essential to building a more just equitable and sustainable society in the face of the 21st century's challenges I am grateful to all the contributors who have enriched this volume with their research and insights Their dedication to critical inquiry and commitment to social change is what makes this collection both timely and transformative

In AI We Trust Helga Nowotny, 2021-08-19 One of the most persistent concerns about the future is whether it will be dominated by the predictive algorithms of AI and if so what this will mean for our behaviour for our institutions and for what it means to be human AI changes our experience of time and the future and challenges our identities yet we are blinded by its efficiency and fail to understand how it affects us At the heart of our trust in AI lies a paradox we leverage AI to increase our control over the future and uncertainty while at the same time the performativity of AI the power it has to make us act in the ways it predicts reduces our agency over the future This happens when we forget that that we humans have created the digital technologies to which we attribute agency These developments also challenge the narrative of progress which played such a central role in modernity and is based on the hubris of total control We are now moving into an era where this control is limited as AI monitors our actions posing the threat of surveillance but also offering the opportunity to reappropriate control and transform it into care As we try to adjust to a world in which algorithms

robots and avatars play an ever increasing role we need to understand better the limitations of AI and how their predictions affect our agency while at the same time having the courage to embrace the uncertainty of the future

The New Rules of Marketing & PR David Meerman Scott, 2024-08-15 The updated ninth edition of the pioneering guide to generating attention for your idea or business jam packed with new AI techniques and fresh stories of success As the ways we communicate continue to evolve keeping pace with the latest technology including generative artificial intelligence AI like ChatGPT can seem an almost impossible task How can you keep your product or service from getting lost in the digital clutter The ninth edition of The New Rules of Marketing and PR offers everything you need to speak directly to your audience make a strong personal connection and generate attention for your business An international bestseller with half a million copies sold in twenty nine languages this revolutionary guide gives you a proven step by step plan for deploying the power of social media AI and content to maintain your competitive advantage and get your ideas seen and heard by the right people at the right time You ll discover the latest approaches for highly effective public relations marketing and customer communications all at a fraction of the cost of traditional advertising The latest edition of The New Rules of Marketing and PR has been completely revised to present highly effective strategies and tactics to help you get found by your buyers The most important and comprehensive update to this international bestseller yet shows you details about the pros and cons of using generative AI the most significant development in modern marketing and public relations since the first edition of this book was published back in 2007 The definitive guide on the future of marketing used as a primary resource in thousands of companies and hundreds of university courses this must have resource will help you Incorporate the new rules that will keep you ahead of the digital marketing curve Make your marketing and public relations real time by incorporating techniques like newsjacking to generate instant attention exactly when your audience is eager to hear from you Gain valuable insights through compelling case studies and real world examples showing you how to use the latest AI tools without losing the personal touch in your communications WThe ninth edition of The New Rules of Marketing and PR How to Use Content Marketing Podcasting Social Media AI Live Video and Newsjacking to Reach Buyers Directly is the ideal resource for entrepreneurs business owners marketers PR professionals and managers in organizations of all types and sizes

Deepfakes Graham Meikle, 2022-09-22 What happens when we can no longer believe what we see Show the AI technologies that create deepfakes enough images of a celebrity or a politician and they will generate a convincing video in which that person appears to say and do things they have never actually said or done The result is a media environment in which anyone s face and image can be remixed and manipulated Graham Meikle explains how deepfakes synthetic media are made and used From celebrity porn and political satire to movie mash ups and disinformation campaigns this book explores themes of trust and consent as face swapping software becomes more common Meikle argues that deepfake videos allow for a new perspective on the taken for granted nature of contemporary media in which our capacity to remix and share content

increasingly conflicts with our capacity to trust The book analyses how such videos deepen the social media environment in which the public and the personal converge and in which all human experience becomes data to be shared Timely clear and accessibly written this is an essential text for students and scholars of media communication cultural studies and sociology as well as general readers

Machine Learning for Intelligent Systems Dr. R. Vasanthi, Divesh Singh Sai, Dr. Gayatri Hegde, Dr. T. Aditya Sai Srinivas ,2025-09-27 Machine Learning for Intelligent Systems focuses on the design and development of systems that can learn adapt and make intelligent decisions autonomously It integrates principles of machine learning artificial intelligence and data analytics to build systems capable of perceiving their environment and improving performance through experience The subject covers supervised and unsupervised learning algorithms neural networks reinforcement learning and deep learning techniques Applications include robotics autonomous vehicles smart devices and intelligent control systems The course emphasizes both theoretical understanding and practical implementation of intelligent data driven systems that can operate effectively in dynamic and complex environments

Contemporary Human Resource Management Adrian Wilkinson,Tony Dundon,Edward Yates,2025-01-08 Written by experts in the field the seventh edition of this well established book provides a critical and academically rigorous exploration of the key functions practices and issues in HRM today The first part of Contemporary Human Resource Management covers fundamental HRM practices while the second half examines contemporary themes and issues such as technology and climate change The book contains over 50 thought provoking case studies showing you how theory relates to real world examples This substantially revised seventh edition includes three completely new chapters and case studies on Remote working New technologies Social media Adrian Wilkinson is Professor of Employment Relations and Human Resource Management at Griffith University and Visiting Professor at the University of Sheffield Tony Dundon is Professor of HRM and Employment Relations at Kemmy Business School University of Limerick and Visiting Professor at the Work and Equalities Institute University of Manchester Edward Yates is a Lecturer in Employment Relations and Human Resource Management at the University of Sheffield
