*The Psychology of Cybersecurity* Tarnveer Singh, Sarah Y. Zheng, 2025-08-29 This book takes a fresh look at the underappreciated role of human psychology in cybersecurity and information technology management. It discusses the latest insights from practice and scholarly work on the role of cognitive bias and human factors in critical decisions that could affect the lives of many people. Written by an experienced chief information security officer (CISO) and an academic with over two decades of lived experience dealing with cybersecurity risks, this book considers the psychological drivers and pitfalls of the four key personas in cybersecurity: from hackers and defenders to targeted individuals and organisational leaders. It bridges state-of-the-art research findings with real-world examples and case studies to show how understanding the psychological factors in cybersecurity can help people protect themselves and their organisations better. Full of advice on security best practices that consider the human element of cybersecurity, this book will be of great interest to professionals and managers in the cybersecurity domain, information technology and governance, and risk management. It will also be relevant to students and those aspiring to grow in this field.

*DIGITAL ENTREPRENEURSHIP* Dr. Suvarna S, Mr. Suresh Chalavadi & Mrs. Lavanya N Gowda, 2025-08-16 Digital entrepreneurship is a modern approach to business that harnesses the power of digital technologies to create, promote, and manage ventures. Unlike traditional entrepreneurship, which often requires physical infrastructure and high startup capital, digital entrepreneurship offers a more accessible, flexible, and scalable model. Entrepreneurs can now launch online stores, mobile apps, content platforms, or service-based businesses with minimal investment, thanks to tools like cloud computing, social media, digital payment systems, and data analytics. Digital entrepreneurship involves the identification and exploitation of digital opportunities to deliver innovative products, services, or business models primarily through digital platforms such as websites, mobile applications, social media, and e-commerce portals. Unlike traditional entrepreneurship, digital entrepreneurship leverages the internet, cloud computing, big data, artificial intelligence, and other emerging technologies to create scalable and flexible businesses. Digital entrepreneurship is driven by the rapid evolution of information and communication technologies (ICTs), which have redefined how businesses operate, interact with customers, and compete in the global marketplace. The digital environment offers lower entry barriers, reduced operational costs, global market access, and real-time customer engagement, making it a fertile ground for startups and innovators. Entrepreneurs can now test ideas quickly, adapt to market feedback in real time, and reach a wide audience with minimal physical infrastructure.
