warranty period Failures and costs are modeled using stochastic techniques and illustrated by means of numerical examples for estimating costs to the manufacturer and consumer Various rectification policies are proposed and analyzed The models developed here can be used to aid in managerial decisions on purchasing products with long term warranty policies and maintenance contracts or outsourcing maintenance

Analyzes the history of the contract tort dichotomy underlying product liability law and the effort of the proposed Article 2 revision to clarify that body of law Examines warranties and disclaimers risk of loss rejection revocation of acceptance cure remedies and other traditional structures Unjust Enrichment and Contract Tariq Baloch, 2009-03-12 This book examines the role of unjust enrichment in the contractual context defined as contracts which are a terminated for breach or b subsisting or c unenforceable The book makes three claims in relation to the orthodox common law account of restitution founded on unjust enrichment in the contractual context Firstly the orthodox account correctly proceeds on the basis that the restitutionary claim in the contractual context is founded on an independent cause of action in unjust enrichment rather than some equitable notion of unconscientiousness or the law of contract Secondly the book departs from the orthodox account by rejecting the unjust factors approach and endorsing the absence of basis approach for the law of unjust enrichment Finally the book argues that the right to restitution in the contractual context should be determined by the conditionality of the transfer of the benefit rather than a requirement such as the termination of the contract as the orthodox account dictates To that end the book proposes the following model under which the right to restitution in the contractual context is determined by the resolution of the following two questions 1 Was the transfer of the benefit eg of money or services conditional 2 Was there a qualifying failure of condition A condition can be and often is the other contracting party s counter performance but it may also be an event not promised by either party What qualifies as a failure of condition depends on the type of contract in question This book identifies two types of contracts namely those which are apportioned eg instalment contracts and those which are unapportioned It is only in relation to the latter that termination is required It is a particular strength of the book that it is underpinned by detailed and original historical analysis which makes a novel and distinct contribution to the history of the laws of unjust enrichment and contract Dr Baloch has produced the definitive study of the inter relationship between contract and unjust enrichment This has been achieved by carefully considering the historical roots of our common law and how this is to be understood in its best light in the modern era Robert H Stevens University College London Dr Baloch s exploration of the boundary between contractual and unjust enrichment liability in the 17th to 19th centuries has important things to say about the history of ideas of contract in this period Mike Macnair Oxford University This is an innovative and rigorous book which engages with one of the most difficult areas in the law of unjust enrichment namely the relationship between the law of unjust enrichment and the law of contract Baloch roots his treatment of the modern law in its history and the historical analysis throughout is very careful and well grounded in the primary sources David Ibbetson Cambridge University This is a valuable book thoughtful and well researched It is concerned to build a model that fits comfortably with the cases and its focus is on the work of modern commentators Those concerned with the relationship of contract and the law of restitution whether at a theoretical level or in practice will benefit by careful study of what Dr Baloch has to say whether or not they agree with it Jack Beatson Royal Courts of Justice 14 February 2009 From the foreword *Google Pixel 9 Pro*
