The Business of Sports Scott Rosner, Kenneth Shropshire, 2011-01-07 The Business of Sports Second Edition is a comprehensive collection of readings that focus on the multibillion dollar sports industry and the dilemmas faced by today's sports business leaders. It covers professional Olympic and collegiate sports and highlights the major issues that impact each of these broad areas. The Second Edition provides insight from a variety of stakeholders in the industry and covers the major business disciplines of management, marketing, finance, information technology, accounting, ethics, and law. Each chapter features concise introductions, a broad range of focused readings, and targeted discussion questions and graphs and tables to convey relevant financial data and other statistics. Journal of Dispute Resolution, 2008

Statistical Thinking in Sports Jim Albert, Ruud H. Koning, 2007-07-12 Since the first athletic events, fans of sports and statistics have always maintained a tight and at times mythical relationship. As a way to relay the telling of a game's drama and attest to the prodigious powers of the heroes involved, those reporting on the games tallied up the numbers that they believe best described the action and best Cinderella's Slipper. Mike Nemeth, 2009-09 The Bowl Championship Series (BCS) is under fire from fans, the media, college coaches, Congress, and even our new President. They worry that the two best teams in the country aren't consistently selected by the polls and the BCS computers to play for the National Championship. At stake is prestige, a place in history, recruiting advantages, and boatloads of cash. The solution proposed most often is a playoff system to give more schools a shot at a title. However, the problem of team selection won't go away with a playoff system; it will be exacerbated. The lack of a credible ranking system is the Achilles' heel of the current BCS system. Cinderella's Slipper reveals why the polls get it wrong, why the BCS computers can't be expected to get it right, why traditional statistics aren't useful for ranking teams, and why won-lost records are misleading. Cinderella's Slipper introduces the performance metrics necessary for team ranking and explains the rating system that can accurately rank teams with similar records. When combined with NCAA sponsorship and an accurate ranking system, a playoff scheme will produce deserving champions and will restore public confidence in the college football National Championship process.
