Competitive Intelligence and Global Business David L. Blenkhorn, Craig S. Fleisher, 2005-01-30 Competitive intelligence CI is the practice of gathering and analyzing information about competitors in order to gain an edge in the marketplace or by shoring up one's own company's defenses prior to an anticipated assault. The stakes are even higher in a global environment where the potential risks and rewards are amplified. This volume explores emerging trends that affect and influence CI today such as the impact of digital commerce, the effects of interest groups and new laws governing the practice of CI across borders. This book illustrates how CI is conducted around the world and highlights the ways in which practicing CI globally is fundamentally different from doing so in a static one country context. The authors offer fresh insights and recommendations for CI specialists, strategic planners and executives, marketers and product developers and anyone studying competition and strategy. Competitive intelligence CI is the practice of gathering and analyzing information about competitors in order to gain an edge in the marketplace, for example by anticipating their next moves and beating them to the punch or by shoring up one's own company's defenses prior to an anticipated assault. The stakes are even higher in a global environment where the potential risks and rewards are amplified. This volume explores emerging trends that affect and influence CI today such as the impact of digital commerce which enhances the speed with which products and services can be delivered around the world as well as the speed with which competitors can surprise you, the effects of interest groups such as those advocating environmental protections which can tilt the playing fields and new laws governing the practice of CI across borders. In this book contributions from researchers, scholars and practitioners specializing in competitive intelligence reveal the most current practices in the field. In depth analysis of emerging approaches to CI in North America, South America, Europe and Asia and in industries across the spectrum from pharmaceuticals to automotive supply chains highlight the ways in which practicing CI globally is fundamentally different from doing so in a static one country context. The authors offer fresh insights and recommendations for CI specialists, strategic planners and executives, marketers and product developers and anyone studying competition and strategy.

Martha E. Williams, 2000 This second edition of Heting Chu's popular work on information representation and retrieval IRR features numerous updates and revisions including coverage of taxonomies, folksonomies, ontologies, social tagging, search, retrieve, web service and next generation OPACs. The chapter on artificial intelligence has been significantly expanded to include a host of related topics such as automatic summarization, question answering, natural language searching and the semantic web. As in the first edition, Chu emphasizes principles and fundamentals. She reviews key concepts and major developmental stages of the field and then systematically examines information representation methods, IRR languages, retrieval techniques and models and internet retrieval systems. In addition, she explains the retrieval of multilingual multimedia and hyperstructured information and explores the user dimension and evaluation issues.
