Preparing STEM Teachers Joanne E. Goodell, Selma Koç, 2020-09-01 STEM project based instruction is a pedagogical approach that is gaining popularity across the USA. However, there are very few teacher education programs that focus specifically on preparing graduates to teach in project based environments. This book is focused on the UTeach program, a STEM teacher education model that is being implemented across the USA in 46 universities. Originally focused only on mathematics and science, many UTeach programs are now offering engineering and computer science licensure programs as well. This book provides a forum to disseminate how different institutions have implemented the UTeach model in their local context. Topics discussed will include sustainability features of the model and how program assessment, innovative instructional programming, classroom research, and effectiveness research have contributed to its success. The objectives of the book are: To help educators gain insight into a teacher education organizational model focused on STEM and how and why it was developed; To present the theoretical underpinnings of a STEM education model, i.e., deep learning, conceptual understanding; To present innovative instructional programming in teacher education, i.e., project-based instruction, functions, and modeling; research methods; To present research and practice in classroom and field implementation and future research recommendations; To disseminate program assessments and improvement efforts. **Implementing a 21st Century**

Competency-Based Curriculum Through Lesson Study Eric C.K. Cheng, Bruce Lander, 2024-03-12 Drawing from a comprehensive collection of university funded teaching development projects, this edited volume explores the theories and practices behind developing pedagogies through Lesson Study for a 21st century curriculum. It encompasses various aspects such as lesson observation, assessment, literacy, online teaching, pedagogy, values education, STEM education, language education, and mathematics education. The chapters investigate the application of Lesson Study in diverse contexts, highlighting its use in ICT based teaching and learning environments, the development and refinement of pedagogies, as well as the integration of AI in education. Through these cases, the content demonstrates how Lesson Study empowers teachers to craft pedagogies that enhance student learning while emphasizing its pivotal role as an innovative approach to address the evolving landscape of education in this digital era. **Implementing a 21st Century Competency Based Curriculum Through Lesson Study** is the first to address the academic discussion of using Lesson Study to develop pedagogies for effective curriculum implementation to tackle the impact of Industry 4.0 on school education. It offers valuable insights, reflections, and practical guidance to policy makers, school leaders, teacher educators, and teachers who are dedicated to enhancing student learning and nurturing the essential skills required for success in the 21st century. *Make: Volume 88* Dale Dougherty, 2024-01-31 Paper printers can print in color, why not 3D printers?
