Financial Aid Smart Home Update:

Quality of Life Improvement: Smart Approaches for the Working and Aging Populations Sabina Baraković, Zahid Akhtar, Jasmina Baraković Husic, 2024-03-19 Quality of life QoL is a broad concept that has many definitions and meanings depending on the context under consideration. It can be perceived as the overall enjoyment of life and a multidimensional concept which emphasizes the self-perceptions of an individual's current state of mind which is affected in a complex way by the person's physical health, psychological state, personal beliefs, social relationships, and their relationship to salient features of their environment. On the other hand, demographic data suggests an increased need for workers worldwide and a rapid aging trend in the active workforce as well as in general. This trend of workforce deficit and population aging will be even more prominent in the future. Therefore, in order to have and sustain a healthy, motivated, and productive workforce but also healthy, independent, and active elderly adults, one must improve their QoL, and vice versa. Improving QoL will improve general public health and in turn create communities who can contribute in diverse and positive ways to both promote and sustain health for future generations. *Innovative Data Communication Technologies and Application* Jennifer S. Raj, Abul Bashar, S. R. Jino Ramson, 2020-01-30 This book presents emerging concepts in data mining, big data analysis, communication, and networking technologies and discusses the state of the art in data engineering practices to tackle massive data distributions in smart networked environments. It also provides insights into potential data distribution challenges in ubiquitous data-driven networks, highlighting research on the theoretical and systematic framework for analyzing, testing, and designing intelligent data analysis models for evolving communication frameworks. Further, the book showcases the latest developments in wireless sensor networks, cloud computing, mobile network autonomous systems, cryptography, automation, and other communication and networking technologies. In addition, it addresses data security, privacy, and trust, wireless networks, data classification, data prediction, performance analysis, data validation, and verification models, machine learning, sentiment analysis, and various data analysis techniques. **Proceedings of the International Conference on Ubiquitous Computing and Ambient Intelligence (UCAmI 2024)** José Bravo, Chris Nugent, Ian Cleland, 2024-12-20 This book serves as a comprehensive compilation of groundbreaking research endeavors within the realms of ambient intelligence and ubiquitous computing. These initiatives are pivotal in enabling both researchers and practitioners to discern recent breakthroughs and emerging frontiers in these fields. Encompassing a wide array of domains including Ambient Active and Assisted Living (A3L), the Internet of Things (IoT), Sustainable Ambient Intelligence, Distributed Ledger Technologies applied to Smart Environments. Finally, two important contributions as Special Sessions: Women and Ambient Intelligence and Impact by design approach for a sustainable innovation in healthcare: good practices and challenges. All mentioned above acting as a valuable resource for scholars, professionals, and graduate students alike. The primary aim of this compilation is to empower individuals within the academic and professional community to harness this wealth of knowledge. It equips them to tackle

innovative challenges and engineer smart and ubiquitous solutions that will shape the landscape of the next decade By amalgamating insights from various facets of ambient intelligence and ubiquitous computing this book encourages cross disciplinary collaboration and fosters a holistic understanding of the field Thus it not only highlights the recent strides in these areas but also serves as a roadmap for future exploration and innovation paving the way for a smarter and more interconnected world
