Good Meal Prep Ideas For Beginners and Dummies Barbara Dawson,2020-08-18 Meal prepping is making a meal or recipe then portioning it out to grab and go meals for later If you've ever kept your leftovers from dinner to take with you for lunch then next day you've already mini meal prepped Generally though meal prepping refers to making 3-7 days worth of food at a time Think of it like making your lunches for the week all at once instead of making your lunch every day You can use this same technique for breakfast lunch dinner and snacks Meal prepping isn't a waste and reduces time and money outside your home whether you plan ahead or a budget When considering a day with the question of making meals without having to do it each day to eat it Meal prepping isn't for everyone It is good for the value convenience and efficiency more than anything With meal prepping you generally eat the same thing for a few days in a row so if you don't like leftovers or get bored with food meal prepping isn't for you If having nutritious food while maximizing your time and budget is important to you then doing something different every day meal prepping is usually a good idea I've generally not seen a meal for the month or maybe one other person do a whole month Meal prepping for a whole month would be quite difficult but there are many reasons it would be a really smart idea Food is stored in the refrigerator or freezer in a slow motion In addition to the way food is packed the individual nuances of your refrigerator can impact the quality of refrigerated meals So the food is acceptable having a good texture and flavor will be a big benefit to the eater Always begin with the refrigerator guidelines to be the FDA and then follow them given your own preferences In general I don't think it's more than a few days worth to do it but I find that about a fifth of the food usually lasts a month
