1992-1993 season. The results of the analysis are presented in Table 1. The results show that the model is able to explain 85% of the variance in the data. The model is also able to predict the number of birds that will be present in the study area. The model is able to predict the number of birds that will be present in the study area. The model is able to predict the number of birds that will be present in the study area.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.
