it inside and out in this chapter There are some disadvantages as well that would be remiss of me not to remind you of I'll cover those as well since it is unrealistic for you to assume that everything will always beat hunky dory Either way let's jump in and look at what dropshipping is Dropshipping is the process where a middleman retails a manufacturer's or wholesaler's product The middleman in this case is you the store owner The store owner takes care of all of the marketing aspects and drives traffic to the order pages and the wholesaler takes care of product fulfillment such as delivery and packaging In some cases you can even have the manufacturer brand the product with your own name and have them ship it to your customers This business model is of immense help to the manufacturer and wholesaler since they get to focus on investing in what they know best which is manufacturing the product You get to focus on what you know best which is to drive traffic and bring in sales In effect you're a one person marketing team for the wholesaler's products What's not to like The customer will order the product via your website or sales channel and will pay you money In turn you pay the wholesaler at their quoted price and you pocket the profits

Deforestation and Economic Growth in the Brazilian Amazon Lykke E. Andersen,2002-12-12 A multi disciplinary team of
 authors analyze the economics of Brazilian deforestation using a large data set of ecological and economic variables They
 survey the most up to date work in this field and present their own dynamic and spatial econometric analysis based on
 municipality level panel data spanning the entire Brazilian Amazon from 1970 to 1996 By observing the dynamics of land use
 change over such a long period the team is able to provide quantitative estimates of the long run economic costs and benefits
 of both land clearing and government policies such as road building The authors find that some government policies such as
 road paving in already highly settled areas are beneficial both for economic development and for the preservation of forest
 while other policies such as the construction of unpaved roads through virgin areas stimulate wasteful land uses to the
