One-Sheet-A-Day Math Drills Neki C. Modi, Alpa A. Shah, 2017-11-01 This One Sheet A Day math drill workbook is for 1st grade students who want extra practice with two numbers single digit subtraction It contains 200 math practice sheets one for each school day of the year Upon completion the student will be more competent in 1st grade mathematics and ready to proceed with more difficult exercises Unlike other math drill books this is one of 24 workbooks created to establish a daily routine for each student to practice on their own from grades 1 through 7 It is specifically designed to gradually increase mathematic ability with the least amount of stress for both parent and student Kids need to practice at home to support what they are learning in school but finding resources to help with that goal can be daunting It takes a lot of time searching online for free resources to print or for books with enough exercises Beyond that the options include going to libraries enrolling them in an afterschool class or hiring a personal tutor Who has the time and money for all of that The answer is not many

parents Each and every parent wants to provide enough practice work to their kids but on top of the challenges in finding resources questions remain about how much practice a child needs to boost educational success twenty sheets of practice work a day One sheet a week What s the optimum practice work during a whole academic year Confused The authors have a decade of classroom expertise and have spent a large amount of time researching and wasting resources trying all the options for their own kids Now you can benefit from what they have learnt The result is finding out that ONE SHEET A DAY is the optimum way to support classroom learning and it is amazingly simple This book eliminates the need to take home prints or run around franchises bookstores and libraries trying to find enough material It also prevents you from overwhelming your kids with too many math drill worksheets There are approximately 200 school days a year Simply have your child complete ONE per day

LOST Opportunities Bronwyn Bevan, Philip Bell, Reed Stevens, Aria Razfar, 2012-07-26 Learning in informal settings is attracting growing attention from policymakers and researchers yet there remains at the moment a dearth of literature on the topic Thus this volume which examines how science and mathematics are experienced in everyday and out of school time OST settings makes an important contribution to the field of the learning sciences Conducting research on OST learning requires us to broaden and deepen our conceptions of learning as well as to better identify the unique and common qualities of different learning settings We must also find better ways to analyze the interplay between OST and school based learning In this volume scholars develop theoretical structures that are useful not only for understanding learning processes but also for helping to create and support new opportunities for learning whether they are in or out of school or bridging a range of settings The chapters in this volume include studies of everyday and situated processes that facilitate science and mathematics learning They also feature new theoretical and empirical frameworks for studying learning pathways that span both in and out of school time and settings Contributors also examine structured OST programs in which everyday and situated modes of learning are leveraged in support of more disciplined practices and conceptions of science and mathematics Fortifying much of this work is a leading focus on educational equity a desire to foster more socially supportive and intellectually engaging science and mathematics learning opportunities for youth from historically non dominant communities Full of compelling examples and revealing analysis this book is a vital addition to the literature on a subject with a fast rising profile

The Art of Teaching Children Phillip Done, 2023-07-18 An essential guide for teachers and parents that s destined to become a classic The Art of Teaching Children is one of those rare and masterful books that not only defines a craft but offers a magical reading experience After more than thirty years in the classroom award winning teacher Phillip Done decided that it was time to retire But a teacher s job is never truly finished and he set out to write the greatest lesson of his career a book for educators and parents that would pass along everything he learned about working with kids From the first day of school jitters to the last day s tears Done writes about the teacher s craft classrooms and curriculums the challenges of the profession and the reason all teachers do it the children Drawing

upon decades of experience Done shares time tested tips and sage advice Real learning is messy not linear Greeting kids in the morning as they enter the classroom is an important part of the school day If a student is having trouble look at what you can do differently before pointing the finger at the child Ask yourself Would I want to be a student in my class When children watch you they are learning how to be people and one of the most important things we can do for our students is to model the kind of people we would like them to be Done tackles topics you won t find in any other teaching book including Back to School Night nerves teacher pride the Sunday Blues Pinterest envy teacher guilt and the things they never warn you about in teacher school but should like how to survive recess duty field trips and lunch supervision Done also addresses some of the most important issues schools face today bullying excessive screen time the system s obsession with testing teacher burnout and the ever increasing demands of meeting the diverse learning needs of students But The Art of Teaching Children is more than a guide to educating today s young learners These pages are alive with inspiration humor and tales of humanity Done welcomes us like visitors at Open House Night to the world of elementary school where we witness lessons that go well and others that flop periods that run smoothly and ones that go haywire when a bee flies into the room We meet master teachers and new ones librarians and lunch supervisors principals and parents some with too much time on their hands We get to know kids who want to hold a ball and those who d rather hold a marker students with difficult home lives and children with disabilities youngsters who need drawing out and those who happily announce in the middle of a math lesson that they have a loose tooth With great wit and wisdom irresistible storytelling and boundless compassion The Art of Teaching Children is the new educator s bible for teachers parents and all who work with kids and care about their learning and success

this book are the incidents which are often filed in a child's mind unknown to the adults around them. Mostly these are the misunderstandings of things a kid sees or hears, often taken literally and mulled over in their heads for years either until the kid brings it up and has it explained to him or gets older and figures it out on his own. And in many cases the adults who were originally involved don't find out about the kid's confusion for years to come. Adults often do have their own ways of wording things and most often don't realize that a completely different picture is forming in their child's brain many times an impossible scene. I call these scenes Kiddie Perceptions. And also there are the times when an adult will take on the characteristics of a kid and just act silly for the thrill of it. This is another form of a Kiddie Perception, often referred to as a second childhood. Added to this are the times when an adult tries something hoping for the easy way out of a situation when they should know better. It always has a way of catching up to them though. All of these types of Kiddie Perceptions are laid out for you to see inside. And all of the enclosed Kiddie Perceptions are true. Don't try this at home unless you're a kid or don't know any better.

Trajectories, 2019-02-11 Trajectories The Educational and Social Mobility of Educators from the Poor and Working Class is a collection of mobility narratives of critical scholars in education from poor and working class backgrounds. While Americans have long held deep seated cultural beliefs in the capacity of schooling to level unequal playing fields, there has been little research on the psycho-social processes of social and educational mobility in the United States. Rising Up employs narrative research methodologies to interrogate the experiences of class border crossing via success in school. This volume addresses two discourses within education. First the experiences of those who have crossed class boundaries contribute to a deeper understanding of how social class functions in the United States. The narratives compiled in this volume explore class within the lives of young people on the margins as identities, ambition, and achievement are constructed and negotiated in school. More specifically, the volume suggests new directions for policy and practice to counteract classism in schools and in the broader culture. As they write of the constraints that they circumvented to succeed against the odds, these authors complicate notions of opportunity as the inevitable reward for high achievement. As they write of agency and tenacity, they will illuminate cultural strengths that likely were invisible to teachers and peers. As critical scholars of education, the contributors to this volume speak specifically to ways in which teacher education can and should address issues of class.

Reaching Standards and Beyond in Kindergarten Gera Jacobs, Kathy Crowley, 2010 Focusing on research-based developmentally appropriate practices, this book shows teachers how to help young children reach standards through creative play activities that ignite their enthusiasm to learn.

Technology and Innovation in Adult Learning Kathleen P. King, 2017-02-10 A comprehensive exploration of technology's role in adult learning. Technology and Innovation in Adult Learning introduces educators and students to the intersection of adult learning and the growing technological revolution. Written by an internationally recognized expert in the field, this book explores the

theory research and practice driving innovation in both adult learning and learning technology and illuminates a powerful approach to recognize and leverage these opportunities Building on current trends and research in technology and its use each chapter illustrates the need opportunities and examples of current and future technologies that scaffold adult learning and provides comprehensive coverage of both current and emerging challenges Many adult learning faculty practitioners and students realize that technology presents a growing and ever present set of issues yet few feel confident in identifying the opportunities that arise with each step forward This book clarifies the interplay between adult learning and learning technology and characterizes the cyclic exchange of information and opportunities that link these fields now and in the future Understand the critical issues currently affecting adult learning Learn how technology is presenting both opportunities and challenges for the teaching and learning of adults in different contexts Examine recent research on learning technology for adult learners Discover how technological innovation can be applied now and how it will continue to shape the future of learning Adult learning is on the rise and there is no mistaking technology s role whether they re learning with or about technology today s adult learners come with unique sets of needs and skills that demand specialized approaches Traditional pedagogical techniques don t transfer directly and learning technology requires its own unique approach to development and use Technology and Innovation in Adult Learning equips practitioners to further adult learning and shape the future of the field while providing a rich perspective for classroom inquiry and research Out of the Labyrinth Robert Kaplan, Ellen Kaplan, 2014-02-04 In this sparkling narrative mathematics is indeed set free Michael Shermer author of The Believing Brain In classrooms around the world Robert and Ellen Kaplan s pioneering Math Circle program begun at Harvard has introduced students ages six to sixty to the pleasures of mathematics exploring topics that range from Roman numerals to quantum mechanics In Out of the Labyrinth the Kaplans reveal the secrets of their highly successful approach which embraces the exhilarating joy of math s accessible mysteries Stocked with puzzles colorful anecdotes and insights from the authors own teaching experience Out of the Labyrinth is both an engaging and practical guide for parents and educators and a treasure chest of mathematical discoveries For any reader who has felt the excitement of mathematical discovery or tried to convey it to someone else this volume will be a delightful and valued companion **Misfits and Good Kids: It Gets Worse** Epiphany
