The background of the book cover is a photograph showing a pair of hands cupped together, holding a mound of dark, rich soil. A small, young green plant with three leaves is growing out of the center of the soil mound. The lighting is soft, highlighting the texture of the soil and the skin of the hands.

BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Eco-Homes** Doctor Jenny Pickerill, 2016-01-15 It is widely understood that good affordable eco housing needs to be at the heart of any attempt to mitigate or adapt to climate change This is the first book to comprehensively explore eco housing from a geographical social and political perspective It starts from the premise that we already know how to build good eco houses and we already have the technology to retrofit existing housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States Eco Homes examines the ways in which radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us

Proceedings of the ... National Passive Solar Conference, 1998 Journal of Information Ethics, 1995 **Discovering Profits in Unlikely Places** Scott J. Josiah, 2000 Environmental Science Bernard J. Nebel, 1998 **Feminist Theology with a Canadian Accent** Mary Ann Beavis, Elaine Guillemin, Barbara Helen Pell, 2008 An examination of the Canadian feminist theology context its history its multicultural perspective its expression of marginal experiences its commitment to social justice its exploration of eco feminism and its embrace of cultures ethnicities and the unique contribution of Canada's First Nations peoples *The Global Citizen* Donella H. Meadows, 1991 In The Global Citizen Donella Meadows challenges us to view the world as an interconnected system for which we are all responsible This collection of the best of Meadows's environmental writings demonstrates her rare ability to discuss complex issues such as population poverty and development and solid waste disposal in a clear concise engaging way for a wide audience

Trees, Why Do You Wait? Richard Critchfield, 1991-05 Examines the link between the decline of the rural culture in America and decay of its cities *Understanding Environmental Administration and Law* Susan J. Buck, 1991-12 More than any other field of public administration environmental administration is defined by its legal content Federal legislation has a direct and immediate impact on state and federal bureaucrats and citizen groups must constantly adjust to changing standards for environmental protection and regulation In *Understanding Environmental Administration and Law* Susan J. Buck examines the use of environmental law by exploring the policy process through which such law is made the

political environment in which it is applied and the statutory and case laws that are critical to working within the regulatory system. The book provides an analytic framework for the legal context of environmental administration and familiarizes readers with the development and implementation of the federal regulatory structure. First published in 1991, this revised and expanded edition includes new material on the continuing evolution of environmentalism in the United States, federalism and bureaucratic decision making within the context of the American legal system, citizen suits, counter suits, and the increasingly restrictive perspective of the federal judiciary toward standing, the property rights movement, the impact of political changes on policy development. Unlike most books that deal with environmental law, the focus of this volume is on understanding the law as a managerial tool and fitting it into the overall policy context. Anyone involved with the environment, from students to citizen activists to mid-level managers at the federal, state, and local level, will find it enormously valuable.

Death in the Marsh Tom Harris, 1991-10. Selenium, essential in microscopic doses, can be deadly in larger amounts. *Death in the Marsh* explains how federal irrigation projects have altered selenium's circulation in the environment, allowing it to accumulate in marshes, killing ecosystems and wildlife and causing deformities in some animals.

Learning to Listen to the Land W. B. Willers, 1991-10. A superb collection of essays by some of America's most provocative thinkers and writers on nature and environmental issues.
