Personal Agency The Metaphysics Of Mind And Action:

Personal Agency E. J. Lowe, 2008-09-04 Lowe defends a common sense view of ourselves as free agents capable of bringing about changes in the world through the choices we make rather than being caused to act as we do by factors external to our will He demonstrates many weaknesses of the materialist conception of the human mind and its powers that is dominant in Western philosophy

Personal Agency E. Jonathan Lowe, 2008 E J Lowe defends a common sense view of ourselves as free agents capable of bringing about changes in the world through the choices we make rather than being caused to act as we do by factors external to our will

The Metaphysics of Action David-Hillel Ruben, 2018-06-25 In this book the author provides an account of three central ideas in the philosophy of action trying to act acting or doing and one s action causing further consequences In all three cases novel theories of these phenomena are offered trying to act is not a particular mental or physical act but can be explained using conditionals that action is not the same as causing something to happen and in the case of a special but important subset of actions for example the opening of a window the action is identical to the event of the window s opening A result of this last account is that it places actions out in the world sometimes far removed in time and space from the actor s body The world is full of action actions do not just exist in the many little islands of space and time that all of our bodies inhabit In the final chapter Ruben describes and discusses a skeptical challenge to the idea that we can ever know whether or not someone else has acted rather than just passive events having happened to that person

Free Will and Theism Kevin Timpe, Daniel Speak, 2016-04-29 Concerns both about the nature of free will and about the credibility of theistic belief and commitment have long preoccupied philosophers In addition there can be no denying that the history of philosophical inquiry into these two issues has been dynamic and at least to some degree integrated In a great many cases classical treatments of one have influenced classical treatments of the other and in a variety of ways Without pretending to be able to trace all the historical integrations of these treatments there is no real question that these philosophical interrelations exist and are worthy of further exploration In addition contemporary discussions contain more than a few hints of suspicion that theistic belief is adversely affecting the purity of inquiry into contours of human free will Nevertheless until now there has been no volume systematically exploring the relationship between religious beliefs and various accounts of free will in the contemporary domain With a particular eye on how the former might be either legitimately or illegitimately affecting the latter this collection fills an important gap in the current debate Here sixteen leading philosophers focus their attention on a crucial point of intellectual intersection with surprising and illuminating results

Free Will and Action Explanation Scott Robert Sehon, 2016 Do we have free will and moral responsibility Is free will compatible with determinism Scott Sehon addresses these key questions by focusing on an underlying issue the nature of action explanation He proposes a non causal account of action and agency according to which reason explanation of human behavior is teleological rather than causal

ancient Greeks **More Kinds of Being** E. J. Lowe, 2015-02-23 Taking into account significant developments in the metaphysical thinking of E J Lowe over the past 20 years *More Kinds of Being A Further Study of Individuation Identity and the Logic of Sortal Terms* presents a thorough reworking and expansion of the 1989 edition of *Kinds of Being* Brings many of the original ideas and arguments put forth in *Kinds of Being* thoroughly up to date in light of new developments Features a thorough reworking and expansion of the earlier work rather than just a new edition Reflects the author's conversion to what he calls the four category ontology a metaphysical system that takes its inspiration from Aristotle Provides a unified discussion of individuation and identity that should prove to be essential reading for philosophers working in metaphysics

Neuroscience and the Soul Crisp et al, 2016 It is a widely held belief that human beings are both body and soul that our immaterial soul is distinct from our material body But that traditional idea has been seriously questioned by much recent research in the brain sciences In *Neuroscience and the Soul* fourteen distinguished scholars grapple with current debates about the existence and nature of the soul Featuring a dialogical format the book presents state of the art work by leading philosophers and theologians some arguing for the existence of the soul others arguing against and then puts those scholars into conversation with critics of their views Bringing philosophy theology and neuroscience together in this way brings to light new nuances and significantly advances the ongoing debate over body and soul back of book *Debating Christian Theism* J. P. Moreland, Khaldoun A. Sweis, Chad V. Meister, 2013-08-01 This volume offers groundbreaking dialogue by many of the most prominent scholars in the field in a definitive treatment of central issues in theism and Christian faith

Buddhist Perspectives on Free Will Rick Repetti, 2016-07-28 Throughout the history of Buddhism little has been said prior to the Twentieth Century that explicitly raises the question whether we have free will though the Buddha rejected fatalism and some Buddhists have addressed whether karma is fatalistic Recently however Buddhist and Western philosophers have begun to explicitly discuss Buddhism and free will This book incorporates Buddhist philosophy more explicitly into the Western analytic philosophical discussion of free will both in order to render more perspicuous Buddhist ideas that might shed light on the Western philosophical debate and in order to render more perspicuous the many possible positions on the free will debate that are available to Buddhist philosophy The book covers Buddhist and Western perspectives on the problem of free will The puzzle of whether free will is possible if as Buddhists believe there is no agent self Theravada views Mahayana views Evidential considerations from science meditation and skepticism The first book to bring together classical and contemporary perspectives on free will in Buddhist thought it is of interest to academics working on Buddhist and Western ethics comparative philosophy metaphysics philosophy of mind philosophy of action agency and personal identity *Rethinking Descartes's Substance Dualism* Lynda Gaudemard, 2021-09-01 This monograph presents an interpretation of Descartes's dualism which differs from the standard reading called classical separatist dualism claiming that the mind can exist without the body It argues that contrary to what it is commonly claimed Descartes's texts suggest an

emergent creationist substance dualism according to which the mind is a nonphysical substance created and maintained by God which cannot begin to think without a well disposed body According to this interpretation God's laws of nature endow each human body with the power to be united to an immaterial soul While the soul does not directly come from the body the mind can be said to emerge from the body in the sense that it cannot be created by God independently from the body The divine creation of a human mind requires a well disposed body a physical categorical basis This kind of emergentism is consistent with creationism and does not necessarily entail that the mind cannot survive the body This early modern view has some connections with Hasker's substance emergent dualism 1999 Indeed Hasker states that the mind is a substance emerging at one time from neurons and that consciousness has causal powers which effects cannot be explained by physical neurons An emergent unified self existing entity emerges from the brain on which it acts upon For its proponents Hasker's view explains what Descartes's dualism fails to explain especially why the mind regularly interacts with one and only one body After questioning the notion of emergence the author argues that the theory of emergent creationist substance dualism that she attributes to Descartes is a more appropriate alternative because it faces fewer problems than its rivals This monograph is valuable for anyone interested in the history of early modern philosophy and contemporary philosophy of mind

The Routledge Companion to Free Will Kevin Timpe, Meghan Griffith, Neil Levy, 2016-11-18 Questions concerning free will are intertwined with issues in almost every area of philosophy from metaphysics to philosophy of mind to moral philosophy and are also informed by work in different areas of science principally physics neuroscience and social psychology Free will is also a perennial concern of serious thinkers in theology and in non western traditions Because free will can be approached from so many different perspectives and has implications for so many debates a comprehensive survey needs to encompass an enormous range of approaches This book is the first to draw together leading experts on every aspect of free will from those who are central to the current philosophical debates to non western perspectives to scientific contributions and to those who know the rich history of the subject Chapter 37 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
