Edition is intended as a basic developmental reading text for preservice and in service teachers It has been our experience in
teaching undergraduate and graduate students in education that a developmental perspective of literacy learning provides a
helpful framework for understanding the process We have found that most textbooks on reading methods are organized
topically with chapters on word identification comprehension study strategies use of basal readers literature and classroom
organization *Becoming a Reader* is organized differently We use a stage model of reading development to describe how
children become skilled readers Specific topics such as word identification and comprehension are discussed within this
broader framework The text represents a synthesis of current thinking about how literacy is acquired We have endeavored to
produce a reader friendly text by providing concise descriptions of the various aspects of literacy learning and instruction
supplemented by examples and case studies To avoid overburdening the reader with lengthy literature reviews have have
cited only the most current and relevant sources to document and support the viewpoints presented As you read the text bear
in mind that we regard literacy learning as a language learning process that is best acquired through the functional
purposeful use of print The instructional methods we advocate reflect this basic premise *The Journal of the National*
