Business Case Studies with Management lessons -Volume 1 Dr. Sanjeevni Gangwani,2025-05-12 This book is very useful for teaching any management course through case studies Cases are written in a very simple language so that all students at

the graduate level post graduate level can understand its application Case studies are very important to be taken for teaching management in any type of course as it immerses students in real world scenarios fostering critical thinking problem solving and decision making skills while also bridging the gap between theory and practice Case studies present complex real life situations or problems that managers have faced allowing students to analyze discuss and propose solutions They encourage active participation and engagement moving beyond passive learning by placing students in the role of decision makers The emphasis is on the analytical process and the reasoning behind decisions rather than solely on finding a correct answer Case studies can encompass various management disciplines allowing for a holistic understanding of organizational challenges They are a form of problem based learning where students learn by grappling with real world problems There are various benefits of using case studies in teaching management courses Case studies enhance critical thinking analytical abilities communication skills and interpersonal skills Students practice making decisions under pressure weighing different options and understanding the consequences of their choices They bridge the gap between theory and practice allowing students to apply their knowledge to real world scenarios The real world nature of case studies makes learning more engaging and relevant for students Case studies encourage open discussion and debate fostering a collaborative learning environment Successfully navigating complex case studies can build students confidence in their abilities as future managers This book consists of diverse case studies related to various sectors It also includes the case objective overview of company summary and conclusion and questions for discussion I hope management faculty in all types of business school worldwide will find this comprehensive book on business case studies very helpful for class room teaching group discussions and even for giving assignment to students for internal assessment I wish you all a happy learning process and I hope all my efforts in compiling varied cases will contribute for better management learning and student engagement AI Snake Oil Arvind

Narayanan, Sayash Kapoor, 2025-09-23 From two of TIME's 100 Most Influential People in AI what you need to know about AI and how to defend yourself against bogus AI claims and products Confused about AI and worried about what it means for your future and the future of the world You're not alone AI is everywhere and few things are surrounded by so much hype misinformation and misunderstanding In AI Snake Oil computer scientists Arvind Narayanan and Sayash Kapoor cut through the confusion to give you an essential understanding of how AI works and why it often doesn't where it might be useful or harmful and when you should suspect that companies are using AI hype to sell AI snake oil products that don't work and probably never will While acknowledging the potential of some AI such as ChatGPT AI Snake Oil uncovers rampant misleading claims about the capabilities of AI and describes the serious harms AI is already causing in how it's being built marketed and used in areas such as education medicine hiring banking insurance and criminal justice The book explains the crucial differences between types of AI why organizations are falling for AI snake oil why AI can't fix social media why AI isn't an existential risk and why we should be far more worried about what people will do with AI than about anything AI will do

on its own The book also warns of the dangers of a world where AI continues to be controlled by largely unaccountable big tech companies By revealing AI's limits and real risks AI Snake Oil will help you make better decisions about whether and how to use AI at work and home *Generative AI Design Patterns* Valliappa Lakshmanan,Hannes Hapke,2025-10-03 Generative AI enables powerful new capabilities but they come with some serious limitations that you'll have to tackle to ship a reliable application or agent Luckily experts in the field have compiled a library of 32 tried and true design patterns to address the challenges you're likely to encounter when building applications using LLMs such as hallucinations nondeterministic responses and knowledge cutoffs This book codifies research and real world experience into advice you can incorporate into your projects Each pattern describes a problem shows a proven way to solve it with a fully coded example and discusses trade offs Design around the limitations of LLMs Ensure that generated content follows a specific style tone or format Maximize creativity while balancing different types of risk Build agents that plan self correct take action and collaborate with other agents Compose patterns into agentic applications for a variety of use cases *The Economic Impacts and the Regulation of AI: A Review of the Academic Literature and Policy Actions* Mariarosaria Comunale,Andrea Manera,2024-03-22 We review the literature on the effects of Artificial Intelligence AI adoption and the ongoing regulatory efforts concerning this technology Economic research encompasses growth employment productivity and income inequality effects while regulation covers market competition data privacy copyright national security ethics concerns and financial stability We find that i theoretical research agrees that AI will affect most occupations and transform growth but empirical findings are inconclusive on employment and productivity effects ii regulation has focused primarily on topics not explored by the academic literature iii across countries regulations differ widely in scope and approaches and face difficult trade offs

Deconstructing Digital Capitalism and the Smart Society Mel van Elteren,2025-01-01 Today's critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for

more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future **Advanced Information**

Networking and Applications Leonard Barolli,2024-04-08 The aim of the book is to provide latest research findings innovative research results methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications Networks of today are going through a rapid evolution and there are many emerging areas of information networking and their applications Heterogeneous networking supported by recent technological advances in low power wireless communications along with silicon integration of various functionalities such as sensing communications intelligence and actuations is emerging as a critically important disruptive computer class based on a new platform networking structure and interface that enable novel low cost and high volume applications Several of such applications have been difficult to realize because of many interconnection problems To fulfill their large range of applications different kinds of networks need to collaborate and wired and next generation wireless systems should be integrated in order to develop high performance computing solutions to problems arising from the complexities of these networks This book covers the theory design and applications of computer networks distributed computing and information systems **Proceedings of Third International Conference in Mechanical and Energy Technology** Sanjay Yadav,P.

K. Arora,Anuj Kumar Sharma,Harish Kumar,2024-08-02 This book presents selected peer reviewed papers from the 3rd International Conference on Mechanical and Energy Technologies which was held on 7 8 December 2023 at Galgotias College of Engineering and Technology Greater Noida India The book reports on the latest developments in the field of mechanical and energy technology in contributions prepared by experts from academia and industry The broad range of topics covered includes aerodynamics and fluid mechanics artificial intelligence non material and non manufacturing technologies rapid manufacturing technologies and prototyping remanufacturing renewable energies technologies metrology and computer aided inspection etc Accordingly the book offers a valuable resource for researchers in various fields especially mechanical and industrial engineering and energy technologies *Building Intelligent Applications with Generative AI*

Yattish Ramhorry,2024-08-22 DESCRIPTION Building Intelligent Applications with Generative AI is a comprehensive guide that unlocks the power of generative AI for building cutting edge applications This book covers a wide range of use cases and practical examples from text generation and conversational agents to creative media generation and code completion These examples are designed to help you capitalize on the potential of generative AI in your applications Through clear explanations step by step tutorials and real world case studies you will learn how to prepare data and train generative AI models You will also explore different generative AI techniques including large language models like GPT 4 ChatGPT Llama 2

and Google's Gemini to understand how they can be applied in various domains such as content generation, virtual assistants, and code generation. With a focus on practical implementation, this book also examines ethical considerations, best practices, and future trends in generative AI. Further, this book concludes by exploring ethical considerations and best practices for building responsible GAI applications, ensuring you are harnessing this technology for good. By the end of this book, you will be well equipped to leverage the power of GAI to build intelligent applications and unleash your creativity in innovative ways.

KEY FEATURES Learn the fundamentals of generative AI and the practical usage of prompt engineering. Gain hands-on experience in building generative AI applications. Learn to use tools like LangChain, LangSmith, and FlowiseAI to create intelligent applications and AI chatbots.

WHAT YOU WILL LEARN Understand generative AI, GAI, and large language models (LLMs). Explore real-world GAI applications across industries. Build intelligent applications with the ChatGPT API. Explore retrieval-augmented generation with LangChain and Gemini Pro. Create chatbots with LangChain and Streamlit for data retrieval.

WHO THIS BOOK IS FOR This book is for developers, data scientists, AI practitioners, and tech enthusiasts who are interested in leveraging generative AI techniques to build intelligent applications across various domains.

TABLE OF CONTENTS

- 1 Exploring the World of Generative AI
- 2 Use Cases for Generative AI Applications
- 3 Mastering the Art of Prompt Engineering
- 4 Integrating Generative AI Models into Applications
- 5 Emerging Trends and the Future of Generative AI
- 6 Building Intelligent Applications with the ChatGPT API
- 7 Retrieval-Augmented Generation with Gemini Pro
- 8 Generative AI Applications with Gradio
- 9 Visualize your Data with LangChain and Streamlit
- 10 Building LLM Applications with Llama 2

AWS Certified AI Practitioner (AIF-C01) Study Guide Tom Taulli, 2025-08-14. AI is transforming industries, and cloud-based AI expertise is in high demand. This study guide is your essential resource for mastering foundational AI concepts and AWS tools while preparing for the AIF-C01 certification exam. Author Tom Taulli breaks down complex topics into practical, easy-to-understand lessons that will enhance the test readiness of IT professionals, developers, or data analysts looking to expand into AI. Covering key areas like machine learning, natural language processing, computer vision, and generative AI, this guide also provides hands-on experience with AWS tools such as SageMaker, Bedrock, Rekognition, and Comprehend. With real-world examples, ethical considerations, and exam-focused strategies, you'll gain the confidence to both pass the exam and apply AI concepts in your career. Understand core AI principles and their applications in AWS. Learn how to use AWS's AI tools for real-world business solutions. Grasp key exam strategies with practice questions and expert insights. Apply AI techniques confidently in cloud environments. Achieve certification and enhance your career in AI and cloud computing.

Take Control of Siri, 3rd Edition Scholle McFarland, 2025-04-22. Make the most of Apple's digital assistant. Version 3.0 updated April 22, 2025.
