The Power of Middle School Keen J. Babbage, 2012-09-14 The middle school years are a maze of academic duties human growth and self development discovering self identity and increasing social interaction with other people This maze can be an adventure of achievement and opportunity or it can be a struggle of difficulty and disappointment As these experiences are the impetus or foundation for many later achievements in academics careers and personal life it is imperative that educators maximize these formative years by helping middle school students successfully travel through this maze despite its ups and downs its twists and turns and its new challenges to master and the old issues to resolve For instance educators must support students who have fallen behind so as to thwart their reduced likelihood of turnaround in high school Likewise educators must challenge exceptional students in order to perpetuate their enthusiasm for learning and prepare them for college studies By discussing the comprehensive roles and duties of school administrators counselors and teachers *The Power of Middle School* addresses how to maximize middle school curriculum and extra curricular activities for the academic personal and professional benefits of all students

Julie Polanco, 2018-05-15 This practical guide to Christian homeschooling addresses child development education methods and God's Word on the subject. The prospect of taking on full responsibility for your child's education can seem daunting. But with a little advice, some preparation and knowledge of what God says in His Word about it, the rewards can vastly outweigh the challenges. God Schooling guides readers through both secular and Christian thought on child development and education methods as well as Bible references that show us how God wants our children to be raised and educated. Homeschooling parent Julie Polanco also shares her own stories and advice based on nearly fifteen years of homeschooling her own children.

Resources in Education, 1982-10

Back to the Basics of Teaching and Learning David W. Jardine, 2017-07-05 This book is about an ecological interpretive image of the basics. Essays detailing everyday lived events in classroom life are presented to help readers see beneath the surface ordinariness of these events to uncover and examine the underlying complex and contested meanings they contain. Readers are invited to imagine what would happen to our understanding of teaching and learning if we stepped away from the image of basics as breakdown under which education labors today, an image of fragmentation, isolation, and the consequent dispensing, manipulation, and control of the smallest, simplest, most meaningless bits and pieces of the living inheritances that are entrusted to teachers and learners in schools. By involving readers in rethinking the idea of the basics in educational theory and practice, this book offers a more generous, rigorous, difficult, and pleasurable image of what this term might mean in the living work of teachers and learners. This is a valuable text for practicing teachers and student teachers interested in reimagining what is basic to their work and the work of their students. It also provides examples of interpretive inquiry that will be helpful for graduate students and scholars in the areas of curriculum, teaching, and learning who are interested in pursuing this form of research and writing. The Second Edition is guided by the view that thinking the world together is a form of ecological thinking. Adds chapters that take up the ecological aspects of this vision, the hermeneutic aspects, and curricular aspects in the areas of mathematics, reading and writing, and social studies. Included also are chapters on child development, information and communications technologies, and more. Proposes a version of the basics that asks teachers to be public intellectuals who think about the world who think about the knowledge we have inherited and to which we are offering our students living, breathing access.

Adaptive Implementation Ryoko Yamaguchi, 2017-07-21 After decades spent pondering basic questions about adopting or implementing best practices in education, educators have assembled a canon of evidence-based strategies and programs that should consistently produce

good outcomes So why is the work of educating students still such challenging work for so many The best most skilled educators adapt programs every day to meet the changing needs of their students One size does not fit all and one textbook teaching strategy or program will never meet the needs of all teachers and learners Adaptive Implementation Navigating the School Improvement Landscape focuses on how practitioners and researchers together continue to improve their craft by systematically collecting data on adaptations testing them out and figuring out what works We provide a framework for building an adaptive implementation process in education with tools and templates for practitioners to use In the end we hope that this book sparks a dialogue among educators as they continue to create adaptive implementation processes that work for their context *Consultation Across Cultural Contexts* Antoinette Miranda, 2015-11-06 Consultation Across Cultural Contexts addresses the challenges that school psychologists face when working in unfamiliar settings and diverse cultural contexts Establishing first the necessity of understanding and respecting these contexts this book provides both theoretical background knowledge and a wealth of technical and practical information animated by first hand accounts Divided into sections that touch upon topics such as difficult teachers and the role of poverty race and class the selections include examples from diverse school ecologies schools in various states of transition resource challenged schools and more
