Nursing Research: Reading, Using, and Creating Evidence(Second Edition) Janet Houser, PhD, RN, **Why We Eat, How We Eat** Emma-Jayne Abbotts,Anna Lavis,2016-02-11 Why We Eat How We Eat maps new terrains in thinking about relations between bodies and foods With the central premise that food is both symbolic and material the volume explores the intersections of current critical debates regarding how individuals eat and why they eat Through a wide ranging series of case studies it examines how foods and bodies both haphazardly encounter and actively engage with one another in ways that are simultaneously material social and political The aim and uniqueness of this volume is therefore the creation of a multidisciplinary dialogue through which to produce new understandings of these encounters that may be invisible to more established paradigms In so doing Why We Eat How We Eat concomitantly employs eating as a tool a novel way of looking while also drawing attention to the term eating itself and to the multiple ways in which it can be constituted The volume asks what eating is what it performs and silences what it produces and destroys and what it makes present and absent It thereby traces the webs of relations and multiple scales in which eating bodies are entangled in diverse and innovative ways contributors demonstrate that eating draws into relationships people places and objects that may never tangibly meet and show how these relations are made and unmade with every mouthful By illuminating these contemporary encounters Why We Eat How We Eat offers an empirically grounded richness that extends previous approaches to foods and bodies **Food as Medicine** Andrea K. Boggild ,Micaela Cook Karlsen,2024-10-22 Let food be thy medicine a mantra famously attributed to Hippocrates captures the central role of nutrition and dietary patterns in human health Not only is the food we consume linked to prevention of diseases of dietary deficiency such as scurvy pellagra and Kwashiorkor so too is it related to diseases of caloric abundance such as type 2 diabetes obesity and hypertension Moreover patterns of food consumption are increasingly linked to restoration of health and maintenance of disease free states following diagnoses such as cardiovascular disease stroke and cancer Finally our ever expanding knowledge of the human microbiome s role in health and disease continues to implicate patterns of food consumption to microbial diversity and function and their impact on mood cognitive status and metabolic health Never has the scientific examination of Hippocrates famous tenet been more timely and needed Food As Medicine is complementary to the field of lifestyle medicine which promotes health behavior change across six domains including nutrition exercise sleep
