An Ontological Rethinking of Identity in International Studies

Yong-Soo Eun,2023-05-05 This book shows that identity studies in the discipline of International Relations IR generally cohere around two discrete understandings of being substantialism and correlationism and that their analytical theoretical and epistemological orientations are split along those lines This binary opposition makes it difficult for identity scholarship to meet the internal validity standard of coherence while unnecessarily narrowing the theoretical lenses of constructivism in IR The author argues that the best way to step outside that binary is to re ground identity in ontology of immanence The book shows that immanent ontological thinking enables us to have a pluralist epistemology and methodology for the study of identity including both positivist and interpretivist orientations without yielding a logically inconsistent alignment

International Studies

Scott Straus,Barry Driscoll,2018-09-10 The challenge of teaching international studies is to help you think coherently about the multiple causes and effects of global problems In International Studies Global Forces Interactions and Tensions award winning scholars Scott Straus and Barry Driscoll give you a clear framework that pinpoints how key factors forces interactions and tensions contribute to world events with both global and local consequences The authors first show you how to look for common patterns in global issues by introducing four world shaping forces global markets shifting centers of power information and communications technologies and global governance They systematically trace how these forces prompt interactions among world actors and thus give rise to a set of tensions that spur key

challenges The framework enables you to ask and answer for yourself Who is interacting Where did such interactions develop What policies or institutions govern them Why are they getting certain global and local reactions You are then apply the framework to the global problems that matter most to you human rights abuses economic inequality terrorism forced migration pandemics and global health responses climate change food security and more International Studies raises the bar for the Introduction to IS course moving beyond interdisciplinary and into the realm of critical analysis to increase student relevancy and motivation

White Nativism, Ethnic Identity and US Immigration Policy Reforms Maria del Mar Farina,2017-09-22 Analysing US immigration and deportation policy over the last twenty years this book illustrates how US immigration reform can be conceived as a psychological legal policy driven tool which is inexorably entwined with themes of American identity national belonging and white nativism Focusing on Hispanic immigration and American born children of Mexican parentage the author examines how engrained historical individual and collective social constructions and psychological processes related to identity formation can play an instrumental role in influencing political and legal processes It is argued that contemporary American immigration policy reforms need to be conceptualized as a complex conscious and unconscious White Nativist psychological legal defence mechanism related to identity preservation and contestation Whilst building on existing theoretical frameworks the author offers new empirical evidence on immigration processes and policy within the United States as well as original research involving the acculturation and identity development of children of Mexican immigrant parentage It brings together themes of race ethnicity and American national identity under a new integrated sociopolitical and psychological framework examining macro and micro implications of
