Innovation and Technologies for the Digital Transformation of Education Francisco José García-Peñalvo, María Luisa Sein-Echaluce, Ángel Fidalgo-Blanco, 2024-06-06 This book provides a critical overview of the current use of learning technologies for educational innovation and examines global trends in educational innovation. It also shares experiences in educational innovation with learning technologies in Europe and Latin America. Despite increasing concerns about the use of technology in education, this book discusses how these can be addressed by focusing on fundamental principles such as personalization, collaboration, engagement, accessibility, and professional development. **Multidisciplinary Approaches in AI, Creativity, Innovation, and Green Collaboration** Fields, Ziska, 2023-05-01 Creativity must be turned into innovation that adds value and leads to strategic action. Innovation is often associated with Silicon Valley expensive research and development departments and expensive commercialization that primarily benefits a small portion of the world's population. A small portion of the world's population working together to solve wicked green problems is not enough; either green creativity and eco-innovation are necessary to help solve green problems by making products and services available and affordable to the masses. Multidisciplinary Approaches in AI Creativity Innovation and Green Collaboration focuses on the importance of green creativity, eco-innovation, and collaboration to create a more sustainable world. It builds on the available literature and joint expertise in the field of management while providing further research opportunities in this dynamic field. Covering topics such as eco-leadership, green marketing, and social responsibility communication, this premier reference source is a comprehensive and timely resource for government officials, decision makers, business leaders, and executives, students and educators of higher education, librarians, researchers, and academicians. **Proceedings of 4th International Conference on Artificial Intelligence and Smart Energy** S. Manoharan, Alexandru Tugui, Zubair Baig, 2024-06-07 This book presents a comprehensive collection of research chapters focusing on innovative solutions to energy and sustainability challenges. It reflects the collaborative efforts of researchers worldwide showcasing novel approaches to complex problems. Topics discussed range from securing cyber-physical systems to revolutionizing healthcare with AI and robotics, emphasizing sustainable research. The book emphasizes smart and sustainable energy solutions, highlighting advancements in solar panel efficiency, fault analysis, and fuzzy-controlled converters for grid-tied photovoltaic systems. Additionally, it explores AI's transformative potential in water solutions, agriculture, and renewable energy technologies across domains like smart cities, transportation, and healthcare. The insights shared aim to inspire further research, foster discussions, and drive real-world impact toward a resilient, inclusive, and sustainable future. Discusses issues and offers sustainable solutions to meet the challenges faced by today's economy and
