Hacking Your Education Dale J. Stephens,2013-03-05 It s no secret that college doesn t prepare students for the real world Student loan debt recently eclipsed credit card debt for the first time in history and now tops one trillion dollars And the throngs of unemployed graduates chasing the same jobs makes us wonder whether there s a better way to make it in today s marketplace There is and Dale Stephens is proof of that In Hacking Your Education Stephens speaks to a new culture of hackademics who think college diplomas are antiquated Stephens shows how he and dozens of others have hacked their education and how you can too You don t need to be a genius or especially motivated to succeed outside school The real requirements are much simpler curiosity confidence and grit Hacking Your Education offers valuable advice to current students as well as those who decided to skip college Stephens teaches you to create opportunities for yourself and design your curriculum inside or outside the classroom Whether your dream is to travel the world build a startup or climb the

corporate ladder Stephens proves you can do it now rather than waiting for life to start after graduation day *National Hardware Bulletin* ,1923 **Smoke & Mirrors** Gemma Milne,2020-04-23 Stop following the news until you've read Gemma Milne's persuasive analysis of the hype and bullshit that distort our understanding of emerging science. As she shows the starting point to grasping the genuine opportunities of AI, life sciences and climate tech is a healthy dose of critical thinking. David Rowan, founding editor of WIRED UK and author of *Non Bullshit Innovation: Radical Ideas from the World's Smartest Minds* Couldn't be more timely. Fascinating and vitally important. Jamie Bartlett, author of *The People Vs Tech* A much needed blast of fresh air. Gemma Milne expertly shows us how to separate the truth from the hype surrounding the emerging techs of today and those of the near tomorrow. Lewis Dartnell, author of *Origins: How the Earth Made Us* I loved this book. This is exactly the sort of sceptical cut through the crap but still excited about what's emerging book around tech innovation that's sorely needed yet is so hard to find. Essential reading for anyone who's serious about how real world advances might be effectively harnessed to build a better future. Dr Andrew Maynard, scientist and author of *Films from the Future* and *Future Rising* A vital contribution in a world where technological progress promises so much but too often disappoints. If like me you believe that advances in science and technology are our best hope for solving the grand challenges of our times, this book is the indispensable guide to avoiding the mirages and the charlatans along the way. Matt Clifford, co-founder and CEO of Entrepreneur First. A refreshingly grown up, clear-headed look at the interaction between science, technology and the media, readable without being dumbed down, acknowledging complexities without being heavy. Tom Chivers, author of *The AI Does Not Hate You* ROBOTS WILL STEAL YOUR JOB AI WILL REVOLUTIONISE FARMING GENETIC EDITING WILL CURE CANCER Bombastic headlines about science and technology are nothing new. To cut through the constant stream of information and misinformation on social media or grab the attention of investors or convince governments to take notice, strident headlines or bold claims seem necessary to give complex, nuanced information some wow factor. But hype has a dark side too. It can mislead. It can distract. It can blinker us from seeing what is actually going on. From AI, quantum computing and brain implants to cancer drugs, future foods and fusion energy, science and technology journalist Gemma Milne reveals hype to be responsible for fundamentally misdirecting or even derailing crucial progress. Hype can be combated and discounted, though if you're able to see exactly where, how and why it is being deployed. This book is your guide to doing just that.
