Repay As You Earn Philip G. Schrag,2001-11-30 In 1993 Congress created a student loan repayment plan intended to enable high debt graduates to accept low income public service jobs by reducing their loan payments and eventually forgiving part of their debts But this Congressional initiative only helps those with catastrophically low incomes It has failed to attract many users because as implemented through regulations of the U S Department of Education it requires payment over too long a period 25 years before forgiveness Many students go to graduate and professional schools in pursuit of careers in public service But they often must borrow 100 000 or more to finance their education Their loan repayment obligations become so high that they can no longer afford to follow their ideals and they abandon their plans to have public service careers and seek employment with corporations or firms offering high salaries The income contingent repayment plan should have appealed to would be public interest lawyers who are among the graduates with the highest debt to income ratios but the plan has failed them and Schrag explores why and how the plan should be reformed either by Congress or by the federal administration

Student Loans in China Baoyan Cheng,2011-03-24 In 1989 China started charging tuition on a very small scale at a number of universities as a result of the global trend of cost recovery

policies thus ending the free higher education era in China. It was not until 1997 that all higher education institutions in China started charging tuition and fees. Both the expansion of higher education and the wide gap between income and tuition and fees have created an increasingly high proportion of students who are academically qualified but cannot afford to go to college. To address the problem of the increasing number of financially needy students in 1999 China launched the pilot Government subsidized Student Loan Program GSSLP in eight cities. This program was extended to full time students at all of the 1 942 public higher education institutions in 2000 and has been undergoing revisions ever since including major ones in 2004 and 2007. As of 2009 the number of financially needy students in China reached 5.27 million accounting for 23.06 percent of the total enrollment of 22.85 million at higher education institutions in China. Behind those statistics are young people who suffer in many ways. This book provides multiple perspectives namely global comparative empirical practical and philosophical ones on the GSSLP the largest financial aid program in current China. It not only provides information on financial aid policies especially the GSSLP in China but also offers a comparative perspective by examining student loan programs in the United States and Australia which are more mature and better developed. Using original dataset the empirical and practical perspectives examine the effect of the GSSLP on students behavior and look into the different aspects of the GSSLP including students perceptions of and attitudes toward the program as well as its implementation. In addition to these technical aspects of the GSSLP this book also examines the larger concepts of equality and social justice from a philosophical perspective and argues

The History of College Affordability in the United States from Colonial Times to the Cold War Thomas Adam, 2020-10-13. This book examines how tuition and student loans became an accepted part of college costs in the first half of the twentieth century. The author argues that college was largely free to nineteenth century college students since local and religious communities donors and the state agreed to pay the tuition bill with the expectation that the students would serve society upon graduation. College education was essentially considered a public good. This arrangement ended after 1900. The increasing secularization and professionalization of college education as well as changes in the socio economic composition of the student body which included more and more students from well off families caused educators college administrators and donors to argue that students pursued a college degree for their own advancement and therefore should be made to pay for it. Students were expected to pay tuition themselves and to take out student loans in order to fund their education
