What Works Clearinghouse (ED), 2013 Can Scholarships Alone Help Students Succeed Lessons from Two New York City Community Colleges examined the effects of performance based scholarships for low income community college students ages 22-35 who were required to enroll in remedial courses The study evaluated the impact of the scholarships on continued community college enrollment credits attempted and earned and cumulative grade point average GPA All study subjects were eligible for Pell Grants Study authors randomly assigned 1,502 students at two New York City community colleges into one of three groups a students were offered a performance based scholarship for two semesters up to 2,600 b students were offered a performance based scholarship for two semesters plus one summer term up to 3,900 and c students were not offered a performance based scholarship though these students were still eligible to receive other financial aid Scholarships were awarded directly to students on top of their existing financial aid at the beginning middle and end of each semester contingent on their continued enrollment and grades The two scholarship groups were combined for most analyses Study

authors reported findings for a number of outcomes related to enrollment course taking and grades The portion of the study that examined enrollment rates reported that at the end of the two semester program 78 1% of the scholarship students were still enrolled versus 76 6% of the students in the control group Enrollment for the scholarship and control groups respectively was 61 9% versus 60 7% one semester after the program ended and 51 2% versus 49 5% two semesters after the program ended None of these differences are statistically significant Review of Reviews for Australasia William Henry Fitchett, Henry Stead, William H.
