Retooling Study Abroad Carmen Granda, 2023-11-02 Study abroad is the ideal option for world language students to immerse themselves in the target language and culture. However, circumstances beyond control may make travel challenging, even impossible. Technology has the potential to engage students and provide an opportunity for linguistic and cultural immersion from home. In addition to immersing students in the target language and culture, Carmen Granda shows that technology can be implemented in all world language courses to foster connections and comparisons and most importantly create community in and outside of the classroom. She demonstrates that digital tools have the power to make language learning inclusive of and accessible to all students fulfilling diversity, equity, and inclusion (DEI) goals of higher education.

Children's Literature and Culture Rebecca Rowe, 2025-08-08 Children's Literature and Culture: An Introduction guides readers in the study of culture in and around children's literature. Children's literature has long been used as a mechanism by which a culture passes its values from one generation to the next. Because of this culturally didactic purpose, children's literature can be viewed as one of the most fruitful areas of study of any given culture. At the same time, studying the cultures from which works of children's literature emerge and in which they circulate can also help better understand not only the ideas of childhood that underpin individual texts for children but the role they play in the construction and transmission of different cultural ideologies. This book teaches readers this double work of using culture to understand children's literature and vice versa. This volume traces the scholarly methodologies and histories that have attended the study of each of the 20 chapters given subject from the representation of race in and around children's literature to questions of censorship to how libraries can and do shape children's literature. In the process, it prepares readers to confidently enter and forward scholarly debates and to teach such debates to their own students.
