Intelligence in Accounting Cory Ng, John Alarcon, 2020-12-08 Artificial Intelligence in Accounting Practical Applications was written with a simple goal to provide accountants with a foundational understanding of AI and its many business and accounting applications. It is meant to serve as a guide for identifying opportunities to implement AI initiatives to increase productivity and profitability. This book will help you answer questions about what AI is and how it is used in the accounting profession today. Offering practical guidance that you can leverage for your organization, this book provides an overview of essential AI concepts and technologies that accountants should know, such as machine learning, deep learning, and natural language processing. It also describes accounting-specific applications of robotic process automation and text mining. Illustrated with case studies and interviews with representatives from global professional services firms, this concise volume makes a significant contribution to examining the intersection of AI and the accounting profession. This innovative book also explores the challenges and ethical considerations of AI. It will be of great interest to accounting practitioners, researchers, educators, and students.

Introduction to Information Systems R. Kelly Rainer (Jr.), Brad Prince, Cristóbal Sánchez-Rodríguez, Sepideh Ebrahimi, Ingrid Spletstoeser, 2023-10-23 As digital transformation becomes increasingly central to effective corporate strategy today, students must learn how information systems provide the foundation for modern business enterprises. Known for its rich Canadian content and focus on active learning, *Introduction to Information Systems*, Sixth Canadian Edition, shows students how they can use IS to help their current or future employers increase profitability, improve customer service, manage daily operations, and drive impact in their markets. This course demonstrates that IT is the backbone of any business, whether a student is majoring in accounting, finance, marketing, human resources, production, operations management, or MIS. In short, students will learn how information systems provide the foundation for all modern organizations, whether they are public sector, private sector, for profit, or not for profit.
