Brand, Meet Story Heather Pemberton Levy, 2016-10-04 Think of the last great article you read or the last great speech you heard Chances are if you remember one key message you also remember one compelling story That's because the best content starts with a story When it comes to marketing the best business content starts with a story the audience cares about not the brand's message about what it wants to sell them In Brand Meet Story Heather Pemberton Levy describes the Story Comes First method a practical approach that combines techniques from journalism and fiction writing to help brands tell stories that put the readers interests first Whereas most brand marketers create content to sell their product service or technology the Story Comes First method turns this approach on its head to create content with the human moments that truly engage an audience Filled with examples from Levy's experience creating content marketing programs trade books and

hundreds of articles for a variety of B2B and B2C brands the book shows readers a step by step approach to create content designed to deliver business results Brand Meet Story explains the key ways to uncover what your audience cares about and how to turn brand messaging into stories that matter Levy inspires readers to develop a compelling voice that will carry the brand tone and values across all channels and helps them turn their ideas into engaging story driven content their audiences will read love and share

The Aisles Have Eyes Joseph Turow,2017-01-17 The author of Media Today offers a trenchant timely and troubling account of retailers data mining in store tracking and predictive analytics The Philadelphia Inquirer By one expert s prediction within twenty years half of Americans will have body implants that tell retailers how they feel about specific products as they browse their local stores The notion may be outlandish but it reflects executives drive to understand shoppers in the aisles with the same obsessive detail that they track us online In fact a hidden surveillance revolution is already taking place inside brick and mortar stores where Americans still do most of their buying Drawing on his interviews with retail executives analysis of trade publications and experiences at insider industry meetings advertising and digital studies expert Joseph Turow pulls back the curtain on these trends showing how a new hyper competitive generation of merchants including Macy s Target and Walmart is already using data mining in store tracking and predictive analytics to change the way we buy undermine our privacy and define our reputations Eye opening and timely Turow s book is essential reading to understand the future of shopping Turow shows shopping today to be an exercise in unwitting self revelation and not only online The Wall Street Journal Thoroughly researched and clearly presented with detailed evidence and fascinating peeks inside the retail industry Much of this information is startling and even chilling particularly when Turow shows how retail data tracking can enable discrimination and societal stratification Publishers Weekly Revealing Valuable reading for shoppers and retailers alike Kirkus Reviews
