Using Digital Analytics for Smart Assessment Tabatha Farney, 2018-12-13 Tracking the library user's journey is no simple task in the digital world; users can often navigate through a series of different websites including library websites, discovery tools, link resolvers, and more just to view a single journal article. Your library collects massive amounts of data related to this journey, probably more than you realize and almost certainly more than you analyze. Too often, library analytic programs simplify data into basic units of measurements that miss useful insights. Here, data expert Farney shows you how to maximize your efforts. You'll learn how to improve your data collection, clean your data, and combine different data sources. Teaching you how to identify and analyze areas that fit your library's priorities, this book covers case studies of library projects with digital analytics, ways to use email campaign data from MailChimp or ConstantContact, how to measure click-through rates from unavailable items in the catalog to the ILL module, getting data from search tools such as library catalogs, journal search portals, link resolvers, and digital repositories using COUNTER-compliant data from your electronic resources, techniques for using Google Tag Manager for custom metrics and dimensions, descriptions of analytics tools ranging from library analytics tools like Springshare's LibInsights and Orangebo's Savannah to more focused web analytics tools like Google Analytics, Piwik, and Woopra, and data visualization tools like Tableau or Google Data Studio. Focusing on digital analytics principles and concepts, this book walks you through the many tools available, including step-by-step examples for typical library needs.

#mm Net Art—Internet Art in the Virtual and Physical Space of Its Presentation Marie Meixnerová (Ed.), 2019-07-19 Color edition. What is Net art? Does its name refer to the medium it uses? Is it the art of the Netizens, the inhabitants of the internet? Is it an art movement or an art form? This book aims to provide a starting point in the search for answers to these and similar questions concerning the existence of Net art. Edited by Marie Meixnerová, a Czech curator and scholar, #mm Net Art approaches Internet art as a developing art form through five thematic sections that map the chronological stages of this development. Featured authors include Katarína Rusnáková, Dieter Daniels, Marie Meixnerová, Domenico Quaranta, Natalie Bookchin, Alexei Shulgin, Piotr Czerski, Brad Troemel, Artie Vierkant, Ben Vickers, Jennifer Chan, Gene McHugh, Gunther Reisinger, Matěj Strnad, Lumír Nykl. For those who know little about it, this anthology can serve as an introduction to the expert reader; it offers new and as yet unpublished information and hopefully a new perspective. The Unaccountable State of Surveillance Clive Norris, Paul de Hert, Xavier L'Hoiry, Antonella Galetta, 2017-01-24 This book examines the ability of citizens across ten European countries to exercise their democratic rights to access their personal data. It presents a socio-legal research project with the researchers acting as citizens or data subjects and using ethnographic data collection methods. The research presented here evidences a myriad of strategies and discourses employed by a range of public and private sector organizations as they obstruct and restrict citizens' attempts to exercise their informational rights. The book also provides an up-to-date legal analysis of legal frameworks across Europe concerning access rights and makes several

policy recommendations in the area of informational rights It provides a unique and unparalleled study of the law in action which uncovered the obstacles that citizens encounter if they try to find out what personal data public and private sector organisations collect and store about them how they process it and with whom they share it These are simple questions to ask and the right to do so is enshrined in law but getting answers to these questions was met by a raft of strategies which effectively denied citizens their rights The book documents in rich ethnographic detail the manner in which these discourses of denial played out in the ten countries involved and explores in depth the implications for policy and regulatory reform
