universities during financial stress **The Business of Higher Education** Noam Arzt,2018-10-09 Originally published in 1995 The Business of Higher Education focuses on innovation in student financial services It looks at the area of banking function as a tool for colleges and universities and how this can be used to meet the market demand for new services It also addresses how this can be used to balance the financial aid budget The book documents just how much each colleges and universities have changed over the last decade and how each has changed given that market forces increasingly shape institutional aspirations [The College Stress Test](#) Robert Zemsky,Susan Shaman,Susan Campbell Baldrige,2020-02-25 Provides an insightful analysis of the market stresses that threaten the viability of some of America s colleges and universities while delivering a powerful predictive tool to measure an institution s risk of closure In The College Stress Test Robert Zemsky Susan Shaman and Susan Campbell Baldrige present readers with a full frank and informed discussion about college and university closures Drawing on the massive institutional data set available from IPEDS the Integrated Postsecondary Education Data System they build a stress test for estimating the market viability of more than 2 800 undergraduate institutions They examine four key variables new student enrollments net cash price student retention and major external funding to gauge whether an institution is potentially at risk of considering closure or merging with another school They also assess student body demographics to see which students are commonly served by institutions experiencing market stress The book s appendix includes a powerful do it yourself tool that institutions can apply using their own IPEDS data to understand their level of risk The book s underlying statistical analysis makes clear that closings will not be nearly as prevalent as many prognosticators are predicting and will in fact impact relatively few students The authors argue that just 10 percent or fewer of the nation s colleges and universities face substantial market risk while 60 percent face little or no market risk The remaining 30 percent of institutions the authors find are bound to struggle To thrive the book advises these schools will need to reconsider the curricula they deliver the prices they charge and their willingness to experiment with new modes of instruction The College Stress Test provides an urgently needed road map at a moment when the higher education terrain is shifting Those interested in and responsible for the fate of these institutions will find in this book a clearly defined set of risk indicators a methodology for monitoring progress over time and an evidence based understanding of where they reside in the landscape of institutional risk **Neighborhood Democracy** Richard Guarasci,2023-07-03 Higher education and America stand at a perilous moment brought about by economic and social inequality racism and the fracture of civic cohesion and structures From its origins the mission of American higher education was to promote democratic governance and a free fair and orderly society through the education of responsible citizens Just as its mission has become more urgent it is being undermined as colleges and universities find themselves trapped in a fiscal crisis that threatens their very institutional viability a crisis in large part brought about by the very perpetuation of economic and racial inequity and the consequent erosion of consensus about civic purpose and vision This book argues that higher education can and must again

take leadership in promoting the participatory processes and instilling the democratic values needed to build a vibrant and fair society How to do that when as Guarasci argues a majority of colleges and universities are floundering under a business model that generates insufficient net revenue while making college unaffordable Guarasci offers a model of civic mission and engagement whereby through relatively modest investment colleges can develop reciprocal partnerships with local institutions civic and business groups to raise the quality and outcomes of K 12 education promote local entrepreneurship and community involvement raise incomes and increase the attainment of postsecondary education to benefit the wider national economy and colleges around the region and country He demonstrates how civic engagement can revitalize communities and generate developmental and foundation funding Vividly illustrated by the examples of success of students from the shadow community to which Wagner College committed its energies and resources by the stories of the local schools and their principals and the voices of local partners this book offers a compelling and detailed account of what it takes to transform an institution and a neighborhood and a model of renewal A Co Publication with AAC U

Breneman, 2010-12-10 Private liberal arts colleges provide high quality undergraduate education but their survival is in doubt Some see the liberal arts as increasingly irrelevant in a world marked by growing demand for technical training Others wonder how private colleges many with few students and high tuitions can compete successfully against heavily subsidized public colleges and universities David Breneman an economist and former college president explores these and many other educational and economic issues in this book a detailed analysis of more than 200 liberal arts colleges Breneman describes the recent financial and curricular history of liberal arts colleges He explains how
