The Lost History of "Talking to Computers" William Meisel, 2025-03-17 Much science fiction has humans talking to computers an early example being HAL in the movie 2001 in 1968 That vision motivated many people to attempt making the imagined technology real including the author who founded a company developing speech recognition technology in the 1980s Speech recognition was an early part of Artificial Intelligence computers doing a task that had previously been exclusive to humans and proved to be more difficult than early pioneers expected The Lost History of Talking to Computers documents 27 years of those efforts the source of the history is the author's 309 monthly issues of a newsletter tracking the hundreds of companies trying to make a business out of this challenging technology Today we talk to computers frequently on our smartphones e.g. Apple's Siri or Google Assistant or to a home speaker e.g. Amazon's Alexa and often when we telephone a customer service number Most doctors use computer transcription of their notes for Electronic Healthcare Systems Speech recognition is teaching how to speak a new language and finding specific content in a video file How did we get here and where will it take us What can we learn from this history that has implications for the huge investments in more general AI today Readers will be amazed at how many companies were inspired by this challenge beginning more than three decades ago

Sustainable International Business Models in a Digitally Transforming World Anshuman Khare, Arto Ojala, William W. Baber, 2022-03-02 The forces of volatility uncertainty complexity and ambiguity VUCA in today's world are shaping businesses and calling into question the wisdom of existing business models VUCA challenges businesses to digitalize and transform in ways they had not contemplated before This book looks at how successful businesses have revitalized and innovated their business models It illustrates through cases how these businesses have adapted to new forms of globalization through the lens of Business Model Innovation BMI theories in a digital world This book's chapters are divided into three sections The first section examines the existing literature the second section focuses on business processes and behaviour and lastly the third section presents four case studies of sustainable international businesses from sectors such as the fashion and digital services industry Paying attention to business decisions and outcomes the contributors critically examine which theories and practices would be most applicable for a digitally transforming world This book provides insights that will interest researchers and academics in the fields of sustainable business organizational change and digital transformation amongst others Its observations into sustainable digital transformation may also interest business leaders and consultants
