Good Meal Prep Ideas For Beginners and Dummies Barbara Dawson,2020-08-18 Meal prepping is making a meal or recipe then portioning it out to grab and go meals for later If you've ever kept your leftovers from dinner to take with you for lunch then next time you've already mini meal prepped Granted though meal prepping refers to making 3-7 days worth of food at a time Think of it like making your lunches for the week all at once instead of making your lunch every day You can use this same technique for breakfast lunch dinner and snacks Meal prepping involves no waste and results in time and money savings whether the plan is a diet or a budget When making your daily food choices the question is how long will you be able to eat homemade meals without having to do it every day Meal prepping is not for everyone It is good for those who value convenience and often more than anything else With meal prepping you generally eat the same thing for a few days in a row so if you don't like leftovers or get bored with food meal prepping isn't for you If having nutritious food while maximizing your time and budget is important to you then trying something different every day meal prepping is not for you I've generally not seen meal prepping for the family or maybe one other person do a whole family Meal prepping for a whole family would be quite difficult but there are a lot of things that would make it a more realistic option A food is stored in the refrigerator for a long time in addition to the way food is packed the individual nuances of your refrigerator can impact the quality of your refrigerated meals the length of time is acceptable and the texture and flavor will be subject to the eater Always begin with the refrigerator guidelines but the FDA and then consult them against your own preferences In general I don't think it's more than a few days worth of food you'll be able to find that is that fresh and the food you'll be able to find to enjoy
