Openai This Month:

AI for the Good Stefan H. Vieweg, 2021-04-24 While technology advances at a high pace in the age of machine learning there is a lack of clear intent and framing of acceptable ethical standards This book brings together the complex topic of good technology in a cross functional way alternating between theory and practice The authors address the ever expanding discussion on Artificial Intelligence AI and ethics by providing an orientation Pragmatic and recent issues are especially taken into account such as the collateral effects of the COVID19 pandemic An up to date overview of digitization already a very broad field in itself is presented along with an analysis of the approaches of AI from an ethical perspective Furthermore concrete approaches to consider appropriate ethical principles in AI based solutions are offered The book will be appealing to academics from humanities or business or technical disciplines as well as practitioners who are looking for an introduction to the topic and an orientation with concrete questions and assistance

Rules of the Road for Nonprofit Leaders Elizabeth M. Schmidt, 2025-08-01 A reframing of the legal profession for nonlawyers aiming to lead nonprofits more effectively Although the United States has the most robust nonprofit sector in the world the rules governing it are convoluted and often paralyze those who are trying to change the status quo Nonprofit leaders deserve rules that are clearly laid out explaining what they can and should do to achieve their missions rather than emphasizing only what is forbidden Rules of the Road for Nonprofit Leaders offers a translation of the nonprofit legal framework into terms that can be more easily understood by nonlawyers Schmidt provides a different lens through which nonprofit leaders can see more clearly how these laws can be more responsive to the changing needs of the nonprofit sector and of society This book shows nonprofit leaders board members and volunteers how nonprofit law relates to all aspects of nonprofit management

Generative AI in Higher Education Cecilia Ka Yuk Chan, Tom Colloton, 2024-03-21 Chan and Colloton's book is one of the first to provide a comprehensive examination of the use and impact of ChatGPT and Generative AI GenAI in higher education Since November 2022 every conversation in higher education has involved ChatGPT and its impact on all aspects of teaching and learning The book explores the necessity of AI literacy tailored to professional contexts assess the strengths and weaknesses of incorporating ChatGPT in curriculum design and delve into the transformation of assessment methods in the GenAI era The authors introduce the Six Assessment Redesign Pivotal Strategies SARPS and an AI Assessment Integration Framework encouraging a learner centric assessment model The necessity for well crafted AI educational policies is explored as well as a blueprint for policy formulation in academic institutions Technical enthusiasts are catered to with a deep dive into the mechanics behind GenAI from the history of neural networks to the latest advances and applications of GenAI technologies With an eye on the future of AI in education this book will appeal to educators students and scholars interested in the wider societal implications and the transformative role of GenAI in pedagogy and research The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC
