Secure your Mac, with Mac OS X Lion Scott McNulty, 2011-07-27 Macs have a well earned reputation for being secure so you may think that you don t have to lift a finger to keep your Mac protected Sadly that s not the case Apple has to balance security and convenience when it comes to shipping a new operating system On one hand no one wants his or her computer to get hacked On the other hand continually entering passwords and clicking Allow when you just want to check your email is annoying A default installation of Lion which you re probably running on your Mac at the moment leans more toward convenience and less toward security This project shows you how to lock your Mac down a little more just in case some scoundrel absconds with your precious Mac The criminal element is everywhere This is a single short project Other
