Kumar, Jain, Arti, Wang, John, Bharti, Santosh Kumar, Patel, Samir, 2023-06-27 There are various factors that influence the quality and quantity of agricultural products among them weather conditions play the most significant role in agriculture More reliable weather forecasting enables farmers to make important planting and harvesting decisions that can enhance agricultural yield Thus there is a dire need to combine all available modern technologies and agricultural science for economic and environmentally sustainable crop production In this direction artificial intelligence AI serves as a budding solution in the domain of agriculture practices Artificial Intelligence Tools and Technologies for Smart Farming and Agriculture Practices discusses various tools and technologies that can be used in smart farming and agriculture practice and explores the role of different emerging technologies like the internet of things big data machine learning deep learning and AI from agricultural prospects Covering key topics such as farming pests soil and weeds this premier reference source is ideal for environmentalists farmers agriculturalists industry professionals researchers academicians scholars practitioners instructors and students ECCWS2016-Proceedings fo the 15th European Conference on Cyber Warfare and Security "

Robert Koch, Gabi Rodosek, 2016-06-15 These proceedings represent the work of researchers participating in the 15th European Conference on Cyber Warfare and Security ECCWS 2016 which is being hosted this year by the Universitat der Bundeswehr Munich Germany on the 7-8 July 2016. ECCWS is a recognised event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual and empirical advances in the area of Cyberwar and Cyber Security. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of Cyberwar and Cyber Security research available to them. With an initial submission of 110 abstracts, after the double-blind peer review process, there are 37 Academic research papers and 11 PhD research papers, 1 Master's research paper, 2 Work In Progress papers and 2 non-academic papers published in these Conference Proceedings. These papers come from many different countries including Austria, Belgium, Canada, Czech Republic, Finland, France, Germany, Greece, Hungary, Ireland, Kenya, Luxembourg, Netherlands, Norway, Portugal, Romania, Russia, Slovenia, South Africa, Sweden, Turkey, UK and USA. This is not only highlighting the international character of the conference but is also promising very interesting discussions based on the broad treasure trove of experience of our community and participants.

Modern Software Engineering Concepts and Practices: Advanced Approaches Dogru, Ali H., Biçer, Veli, 2010-12-31 Software engineering has advanced rapidly in recent years in parallel with the complexity and scale of software systems. New requirements in software systems yield innovative approaches that are developed either through introducing new paradigms or extending the capabilities of well-established approaches. Modern Software Engineering Concepts and Practices: Advanced Approaches provides emerging theoretical approaches and their practices. This book includes case studies and real-world practices and presents a range of advanced approaches to reflect various perspectives in the discipline.

[An Introduction to Parallel Programming](#) Peter Pacheco, Matthew Malensek, 2021-08-27 An Introduction to Parallel Programming Second Edition presents a tried and true tutorial approach that shows students how to develop effective parallel programs with MPI, Pthreads and OpenMP. As the first undergraduate text to directly address compiling and running parallel programs on multi-core and cluster architecture, this second edition carries forward its clear explanations for designing, debugging and evaluating the performance of distributed and shared memory programs while adding coverage of accelerators via new content on GPU programming and heterogeneous programming. New and improved user-friendly exercises teach students how to compile, run and modify example programs. Takes a tutorial approach starting with small programming examples and building progressively to more challenging examples. Explains how to develop parallel programs using MPI, Pthreads and OpenMP programming models. A robust package of online ancillaries for instructors and students includes lecture slides, solutions manual, downloadable source code and an image bank. New to this edition: New chapters on GPU programming and

heterogeneous programming New examples and exercises related to parallel algorithms *Global Trends in Manufacturing Supply Chains* Jing Wu, 2025-03-21 This book offers an in depth and comprehensive analysis of global supply chains through the dual dimensions of time and region which include their origins current challenges and future trajectories It highlights the impact of natural disasters and geopolitical risks illustrating how these factors underscore the vulnerabilities and dependencies within supply chain networks The focus on China s role in global supply chains is particularly relevant given the country s significant impact on global trade manufacturing and economic health Additionally by offering concrete case studies and detailed discussions on the overseas expansion of Chinese companies the book serves as a valuable resource for understanding their strategies the challenges they face and the impacts of their global activities on both their home economy and the global economic landscape The book s unique approach combines rigorous analysis with practical advice making it an indispensable resource for anyone looking to understand and respond to the evolving dynamics of global supply chains
