Social Science Experiments Donald P. Green, 2022-09-14 This book is designed for an undergraduate one semester course in experimental research primarily targeting programs in sociology political science environmental studies psychology and communications Aimed at those with limited technical background this introduction to social science experiments takes a practical hands on approach After explaining key features of experimental designs Green takes students through exercises designed to build appreciation for the nuances of design implementation analysis and interpretation Using applications and statistical examples from many social science fields the textbook illustrates the breadth of what may be learned through experimental inquiry A chapter devoted to research ethics introduces broader ethical considerations including research transparency The culminating chapter prepares readers for their own social science experiments offering examples of studies that can be conducted ethically inexpensively and quickly Replication datasets and R code for all examples and exercises are available online

Advances in Experimental Political Science James N. Druckman, Donald P. Green, 2021-04-01 Experimental political science has changed In two short decades it evolved from an emergent method to an accepted method to a primary method The challenge now is to ensure that experimentalists design sound studies and implement them in ways that illuminate cause and effect Ethical boundaries must also be respected results interpreted in a transparent manner and data and research materials must be shared to ensure others can build on what has been learned This book explores the application of new designs the introduction of novel data sources measurement approaches and statistical methods the use of experiments in more substantive domains and discipline wide discussions about the robustness generalizability and ethics of experiments in political science By exploring these novel opportunities while also highlighting the concomitant challenges this volume enables scholars and practitioners to conduct high quality experiments that will make key contributions to knowledge

There is no doubt that our world is becoming increasingly more connected through digital technologies For meaningful participation in this environment we need to be digitally literate yet there are many children in developing countries who have yet to touch a computer because of social disadvantage For these children schools are the only place where they can build this capacity Regrettably many schools in these communities are under resourced They do not have sufficient and relevant library books let alone digital resources As a consequence teaching and learning strategies have remained unchanged for decades The field of critical pedagogy evolved through the initial work of Paulo Freire This theory is underpinned by critical thinking about societal issues followed by action and reflection When citizens are armed with such knowledge and skills they can positively impact on the lives of the underprivileged Critical pedagogy however is still struggling to find its meaningful place particularly in higher education This is largely due to the lack of effective strategies and critical educators Share Engage Educate is an auto ethnography which presents accounts of the initiatives that were undertaken to promote print and digital literacy in rural and remote schools in eight developing countries It highlights the experiences of school leaders teachers university staff and students and globally minded citizens working alongside local communities to enhance the quality of education for over 15 000 children in these schools This book explores how critical

pedagogy can unfold in educational spaces through knowledge sharing engaging and in the process educating all stakeholders
