Alstete,Nicholas J.

Beutell, John P. Meyer, 2018-06-26 This book probes the dynamics of academic research and scholarship evaluation Readers will learn about scholarly metric evolution impact factors disruptive technologies and a myriad of forces affecting policy development at institutions through an examination of widely used measurements and growing concerns about their influence *Rethinking Legal Scholarship* Rob van Gestel, Hans-W. Micklitz, Edward L. Rubin, 2017-02-02 Although American scholars sometimes consider European legal scholarship as old fashioned and inward looking and Europeans often perceive American legal scholarship as amateur social science both traditions share a joint challenge If legal scholarship becomes too much separated from practice legal scholars will ultimately make themselves superfluous If legal scholars on the other hand cannot explain to other disciplines what is academic about their research which methodologies are typical and what separates proper research from mediocre or poor research they will probably end up in a similar situation Therefore we need a debate on what unites legal academics on both sides of the Atlantic Should legal scholarship aspire to the status of a science and gradually adopt more and more of the methods quality standards and practices of other social sciences What sort of methods do we need to study law in its social context and how should legal scholarship deal with the challenges posed by globalization **Sharia Compliant** Rumeel Ahmed, 2018-05-01 For over a thousand years Muslim scholars worked to ensure that Islamic law was always fresh and vibrant that it responded to the needs of an evolving Muslim community and served as a moral and spiritual compass They did this by hacking Islamic law in accordance with changing times and contexts diving into the interconnected Islamic legal tradition to recalibrate what was outdated making some laws work better and more efficiently while leaving others undisturbed These hacking skills made Islamic law both flexible and relevant so that it could meet the needs of a community with changing values while remaining true to its ancient roots Today the hacking process has stalled in the face of unprecedented structural challenges and Islamic law has stagnated This book is designed to revitalize the hacking tradition by getting readers involved in the process It walks them through the ins and outs of Islamic legal change vividly describing how Muslim scholars have met new and evolving challenges on topics as diverse as abolition democracy finance gender human rights sexuality and more And it provides step by step instructions for readers to hack laws for themselves so that through their engagement and creativity they can help Islamic law regain its intrinsic vitality and resume its role as a forward looking source for good in the world **Winning Grants** Sean Ekins, 2023-06-12 As an academic or a small business owner you will need to write grants at some point in your career Writing them though is not enough what you also need to know is how to win grants Much has been written about writing grants the mysterious special ability called grantsmanship so it occurred to me that there is a need to come at this differently and spill the beans The difficulty in getting a grant in particular an NIH grant like an R01 in the USA is often described it is competitive and gets tougher every year Your proposal therefore must stand out it must connect with the reviewers This is true for all types of grants give the reviewer what they want always But also you need to connect to the program officer the committee that

ultimately makes funding decisions and you must take care of a myriad of other details outside of the main event which is describing the science This means you cannot rely on just out writing the competition it is more than that as you have to out think out strategize and out schmooze them If you have been continually funded for decades that is terrific but if you want to keep being funded there is no guarantee what got you there will keep you there What was a hot technology 4 5 years ago is not the new thing anymore you will need to do something different but what You therefore need to not only think about writing great grants you need to put it into practice and win them Having written and won grants from the NIH and DOD over the past 17 years and longer by the time you read this I possess a valuable perspective Each grant and study section will be different Whether a big or small grant it does not seem to make a difference the reviewers will critique your efforts they may not like it they may reject your ideas or they may love it You have some small degree of control until the proposal leaves your hands or more correctly you click submit You will need to differentiate your grant from the hundreds of others in many ways but you cannot change who you are your history so how you describe yourself and team will also have an impact You could spend hundreds of hours on your proposal or just a day and the outcome might still be the same This small book is a summary of my own personal experiences and will provide some advice that will help you learn how to do a better job of winning grants This book is written by a scientist who writes the grants and develops commercial products Provides a unique perspective on what you need to write better grants Teaches you how to continually win grants This book provides examples from the authors own grant applications The reader will be inspired to start a company to win small business grants
