Higher Education at Risk Sandra Featherman, 2023-07-03 Sandra Featherman believes that colleges are in denial about the severity of the threats to the current model of higher education Based on her own experience as a president as a trustee and as a board member who has worked in private and public universities and on interviews with the presidents of major institutions she offers both a trenchant analysis of those threats and clear prescriptions about the painful but necessary decisions that colleges need to make to ensure they remain viable accessible and affordable and deliver a high quality education Sandra Featherman considers higher education to be at a game changing moment When markets don t function well as is the case with today s college marketplace with offerings that cost too much and return too little it opens the door to new types of suppliers who offer new ways of providing what students are looking for particularly the

increasing cohort of mature working students In the face of new competitors for profit education companies technology start ups and foreign universities vying for international students trustees and senior level administrators are generally stuck in a traditional ethos and with decision making processes unsuited to these times They know what used to work and find it easier to follow old ways than to make the difficult transition to new ways of delivering education She lays out a strategy that emphasizes the centrality of students and how to provide them with the most effective learning environment that is clear eyed about focusing on the core missions and abandoning practices that constrain or impede them and that requires constant self monitoring to learn from and act upon what works She offers a blueprint for redesigning institutions for paring away what is unnecessary and cost ineffective and for adopting the best technologies all in the service of developing meaningful degree programs at an affordable price and widening access for under represented groups She ranges over the implications of budget decisions accreditation and MOOCs addresses government regulation and tuition costs presents promising new models and concludes with 11 key recommendations that should be heeded by all higher education administrators and trustees *Interim Report of the Consultative Committee on Scholarships for Higher Education (adopted by the Committee on May 19, 1916)* Great Britain. The New World of Economics Richard B. McKenzie,Gordon Tullock,2012-05-16 The New World of Economics 6th edition by Richard McKenzie and Gordon Tullock represents a revival of a classic text that when it was first published changed substantially the way economics would be taught at the introductory and advanced levels of economics for all time In a very real sense many contemporary general audience economics books that seek to apply the economic way of thinking to an unbounded array of social issues have grown out of the disciplinary tradition established by earlier editions of The New World of Economics This new edition of The New World will expose new generations of economics students to how McKenzie and Tullock have applied in a lucid manner a relatively small number of economic concepts and principles to a cluster of topics that have been in the book from its first release and to a larger number of topics that are new to this edition with the focus of the new topics on showing students how economic thinking can be applied to business decision making This edition continues the book s tradition of taking contrarian stances on important economic issues Economics professors have long reported that The New World is a rare book in that students will read it without being required to do so *Statistics of Public Education in England and Wales* Great Britain. Ehrenberg,Malcolm Getz,John J. Siegfried,2008-04-15 The last two decades have been a turbulent period for American higher education with profound demographic shifts gyrating salaries and marked changes in the economy While enrollments rose about 50% in that period sharp increases in tuition and fees at colleges and universities provoke accusations of inefficiency even outright institutional greed and irresponsibility As the 1990s progress surpluses in the academic labor supply may give way to shortages in many fields but will there be enough new Ph D s to go around Drawing on the authors experience as economists and educators this book offers an accessible analysis of three crucial economic issues the growth and composition of undergraduate enrollments the supply of faculty in the academic labor market and the cost of operating colleges and universities The study provides valuable insights for administrators and scholars of education *Still Turning* Christopher C. Gillis,2015-09-16 The Aermotor Windmill Company which commenced operations in Chicago in 1888 is the nation s sole remaining full time manufacturer of water pumping machines The company s imprint on rural America particularly across the West is still visible today in the tens of thousands of its windmills that bring water to the

earth's surface Still Turning is the first book to explore the rise of the American windmill through the experience of this important company Aermotor founder La Verne Noyes and engineer Thomas Perry developed and perfected the all metal wind pump in the 1880s Within a decade the mathematical windmill began to dominate the market Aermotor continued to expand and innovate The ruggedness and simplicity of the American mechanical windmill has allowed it to outlast many newer water pumping technologies over the years with minimal maintenance and oversight Christopher C Gillis traces this story and more from the early days of the company to Aermotor's present day relevance as it continues to produce its iconic windmills Still Turning is a significant contribution not only to the history of wind power but also to the history of American enterprise
