It offers guidance on current issues and priority areas to help you make informed judgements about your own practice and argue for further support for your subject in school. It explains current initiatives to enhance STEM teaching and offers a wide range of practical activities to support exciting teaching and learning in and beyond the classroom. Illustrated with examples of successful projects in real schools, this friendly inspiring book explores innovative teaching ideas to make lessons buzz. Activities for successful practical work. Sourcing additional funding. Finding and making the most of the best resources. STEM outside the classroom. Setting up and enhancing your own STEM club. Getting involved in STEM competitions, fairs and festivals. Promoting STEM careers and tackling stereotypes. Health, safety and legal issues. Examples of international projects. An wide ranging list of project and activity titles. Enriched by the authors' extensive experience and work with schools. Success with STEM is a rich compendium for all those who want to develop outstanding lessons and infuse a life long interest in STEM learning in their students. The advice and guidance will be invaluable for all teachers, subject leaders, trainee teachers and NQTs.

Preparation of Space Experiments Vladimir Pletser, 2020-09-02 This book explains how researchers design, prepare, develop, test and fly their science experiments on microgravity platforms before sending them to space. All preparation phases are explained and presented, including aircraft parabolic flights as part of spaceflight preparation. Twenty international authors, all experts in their own microgravity research field, contribute to chapters describing their experience to prepare experiments before space flights. Fields covered are Physical Sciences and Life Sciences. Physical Sciences covers fluid physics, vibration effects on diffusion, red blood cell dynamics, cavitation in microgravity, capillary driven flows and material sciences. Electromagnetic levitator onboard International Space Station. Life Sciences includes human physiology, sampling, earlobe blood, human cardiovascular experiments, tumours in space and neurophysiology, dexterous manipulation of objects in weightlessness.

Nexus Daniel Araya, Yana Breindl, Tessa J. Houghton, 2011 This book is a rich and varied exploration of current and emerging themes. Internet research and a testament to the strength and diversity of the field. Collected here is the work of young scholars at the height of their game, fearlessly exploring and expanding the outer reaches of knowledge and methodology. Anyone looking to see where the next decade of Internet research may take us would do well to follow their lead.
