Cybersecurity in Smart Homes Rida Khatoun, 2022-05-24. Smart homes use Internet-connected devices, artificial intelligence protocols, and numerous technologies to enable people to remotely monitor their home as well as manage various systems within it via the Internet using a smartphone or a computer. A smart home is programmed to act autonomously to improve comfort levels, save energy, and potentially ensure safety. The result is a better way of life. Innovative solutions continue to be developed by researchers and engineers, and thus smart home technologies are constantly evolving. By the same token, cybercrime is also becoming more prevalent. Indeed, a smart home system is made up of connected devices that cybercriminals can infiltrate to access private information, commit cyber vandalism, or infect devices using botnets. This book addresses cyber attacks such as sniffing, port scanning, address spoofing, session hijacking, ransomware, and denial of service. It presents, analyzes, and discusses the various aspects of cybersecurity as well as solutions proposed by the research community to counter the risks. **Cybersecurity in Smart Homes** is intended for people who wish to understand the architectures, protocols, and different technologies used in smart homes.

Technology and Aging Alex Mihailidis, Jennifer Boger, Henry Kautz, 2008. This publication presents articles on Aging in Place, Assistive Technology, Monitoring and Telehealth, Transportation and Mobility, and Design. The section on assistive technology (AT) represents arguably the most mature and generic aspect of technology and aging, except that AT can hardly be regarded really as a specific discipline any longer. Assistive devices and systems command an expansive gamut of technological and engineering specialties, drawing upon mechanical engineering and

needs and design truly useful services The following chapter explores the enabling technology Distributed sensors smart devices and networks appear as the nuts and bolts compulsory to build up smart homes Chapter three looks at the realization of smart homes Pervasive computing is emerging as one of the key approaches to organize computations within smart homes The fourth chapter addresses the issue of using smart home features to design and deliver smart care services to persons with disabilities and elderly people Finally Chapter five outlines standardization efforts and practical and industrial experiences ICOST aims at creating an active research community dedicated to explore how smart homes in particular and health telematics in general can foster independent living and an enhanced life style for elderly and disabled people On the one hand smart homes are augmented environments with embedded computers information appliances and multi modal sensors allowing people to perform tasks efficiently by offering unprecedented levels of access to information and assistance from computer On the other hand health telematics makes the most of networks and telecommunications to propose health services expertise and information at distance

The Connected Home: The Future of Domestic Life Richard Harper, 2011-12-08 The title of this new book The Connected Home reflects the move away from the idea that smart homes would alter the lives of those living in them by providing technologies to take over tasks that were previously the responsibility of the householder such as managing entertainment education and even eating Up until around 10 years ago this view was commonplace but time has shown that the technologies to support a smart home have not developed in such a way as to support this premise Instead what people do in their homes has moved the concept of a smart home into that of the connected home The rise of on line games technologies video connections via Skype social networking internet browsing etc are now an integral part of the home environment and have had a significant effect on the home The contributors to this exciting new book consider and discuss the effects and ramifications of the connected home from a variety of viewpoints an examination of the take up of personal computers and the Internet in domestic situations an analysis of the changing intersection of technology and human habits in the connected home the impact of gaming texting e book readers tablets and other devices and their effect on the social conditions of a household the relationship between digital messaging applications and real geography and an overview of how sensing technologies for the smart home might evolve lightweight medical technologies for example The book culminates by addressing unfinished ambitions from the smart home agenda the factors that have prevented their realisation and addresses the need for extending research into the area
