Political Corruption Arnold J. Heidenheimer, Michael Johnston, 2011-12-31 Corruption is once again high on the international policy agenda as a result of globalization the spread of democracy and major scandals and reform initiatives But the concept itself has been a focus for social scientists for many years and new findings and data take on richer meanings when viewed in the context of long term developments and enduring conceptual debates This compendium a much enriched version of a work that has been a standard reference in the field since 1970 offers concepts cases and fresh evidence for comparative analysis Building on a nucleus of classic studies laying out the nature and development of the concept of corruption the book also incorporates recent work on economic cultural and linguistic dimensions of the problem as well as critical analyses of several approaches to reform While many authors are political scientists work by historians economists and sociologists are strongly represented Two thirds of the nearly fifty articles are based either on studies especially written or translated for this volume or on selected journal literature published in the 1990s The tendency to treat corruption as merely a synonym for bribery is illuminated by analyses of the diverse terminology and linguistic techniques that help distinguish corruption problems in the

major languages Recent attempts to measure corruption and to analyze its causes and effects quantitatively are also critically examined New contributions emphasize especially corruption phenomena in Asia and Africa contrasts among region and regime types comparing U S state corruption incidence European Party finance and corruption assessments of international corruption rating project analyses of international corruption control treaties unintended consequences of anti corruption efforts Cumulatively the book combines description richness analytical thrust conceptual awareness and contextual articulation *Hearings* United States. Congress. House. Committee on Education,1958 *African Students in East Germany, 1949-1975* Sara Pugach,2022-10-13 This book explores the largely unexamined history of Africans who lived studied and worked in the German Democratic Republic African students started coming to the East in 1951 as invited guests who were offered scholarships by the East German government to prepare them for primarily technical and scientific careers once they returned home to their own countries Drawn from previously unexplored archives in Germany Ghana Kenya Zambia and the United Kingdom *African Students in East Germany 1949 1975* uncovers individual stories and reconstructs the pathways that African students took in their journeys to the GDR and what happened once they got there The book places these experiences within the larger context of German history questioning how ideas of African racial difference that developed from the eighteenth through the early twentieth centuries impacted East German attitudes toward the students The book additionally situates African experiences in the overlapping contexts of the Cold War and decolonization During this time nations across the Western and Soviet blocs were inviting Africans to attend universities and vocational schools as part of a drive to offer development aid to newly independent countries and encourage them to side with either the United States or Soviet Union in the Cold War African leaders recognized their significance to both Soviet and American blocs and played on the desire of each to bring newly independent nations into their folds Students also recognized their importance to Cold War competition and used it to make demands of the East German state The book is thus located at the juncture of many different histories including those of modern Germany modern Africa the Global Cold War and decolonization
