making phone calls and streaming music without your phone and drop detection so if you fall and can't get up the fire department is dispatched to your location. Everything about it was designed to motivate you to be more active. As amazing as all the new features are, it's not quite as easy to use as an iPhone. The lack of buttons, the smaller screen, and general UI can make a frustrated initial experience. The point of this book is to help new Apple Watch users and users updating to Watch OS 6 from an older device get the most out of their investment. Are you ready to start enjoying your new Apple Watch? Then let's get started. Note: This book is not endorsed by Apple and should be considered unofficial.

Journalism in the Age of Virtual Reality John V. Pavlik, 2019-09-17. With the advent of the internet and handheld or wearable media systems that plunge the user into 360° video, augmented or virtual reality technology is changing how stories are told and created. In this book, John V. Pavlik argues that a new form of mediated communication has emerged: experiential news. Experiential media delivers not just news stories but also news experiences in which the consumer engages news as a participant or virtual eyewitness in immersive multisensory and interactive narratives. Pavlik describes and analyzes new tools and approaches that allow journalists to tell stories that go beyond text and image. He delves into developing forms such as virtual reality, haptic technologies, interactive documentaries, and drone media, presenting the principles of how to design and frame a story using these techniques. Pavlik warns that although experiential news can heighten user engagement and increase understanding, it may also fuel the transformation of fake news into artificial realities, and he discusses the standards of ethics and accuracy needed to build public trust in journalism in the age of virtual reality. *Journalism in the Age of Virtual Reality* offers important lessons for practitioners seeking to produce quality experiential news and those interested in the ethical considerations that experiential media raise for journalism and the public.
