This book explains how major world economies are recognizing the need for a major push in cyber policy environments It helps readers understand why these nations are committing substantial resources to cybersecurity and to the development of standards rules and guidelines in order to address cyber threats and catch up with global trends and technological developments A key focus is on specific countries engagement in cyberattacks and the development of cyber warfare capabilities Further the book demonstrates how a nation s technological advancement may not necessarily lead to cyber superiority It covers cybersecurity issues with regard to conflicts that shape relationships between major economies and explains how attempts to secure the cyber domain have been hampered by the lack of an international consensus on key issues and concepts The book also reveals how some economies are now facing a tricky trade off between economically productive uses of emerging technologies and an enhanced cybersecurity profile In the context of current paradigms related to the linkages between security and trade investment it also delves into new perspectives that are being brought to light by emerging cybersecurity issues *The Monday Report* Florida.
