The Springfield Gas Machine Donald W. Linebaugh, 2012-01-27 Developed just after the close of the Civil War the Springfield Gas Machine was a unique commercial and domestic gas lighting system marketed for use in homes and businesses outside of a city's gas works The self contained unit was perfectly suited to accommodate an expanding rural and suburban U S landscape as middle and upper class American families were looking to find simplicity in the countryside without losing any modern comforts of the city Industries too were looking for a means to operate more efficiently and implement longer work hours for various production operations Perhaps more important owners of the Springfield system could retain control of their light production during a time when corporations were reaping large benefits from their monopolistic hold over municipal gas works In addition to detailing preserved Springfield systems across the country Donald W Linebaugh uses newspapers and magazine articles advertisements patents and even mail order catalogs to tell the story of this one of a kind unit The Gilbert and Barker Manufacturing Company's innovative business plan established them as a leader in the manufacture of gas lighting devices By taking gasoline from an oft discarded byproduct of refining crude oil to a viable fuel source the company paved the way for other gas powered appliances to improve household management strategies and industrial production In capturing the pre automobile market for gasoline Gilbert and Barker attracted the attention of the Standard Oil Trust presaging the oil industry dominance over gasoline production that continues today The story of the Springfield gas machine ends in the early twentieth century as the advent of electricity proved more available to the masses

with considerably less expense However gas lighting was for its time a major innovation in domestic and commercial lighting and it changed daily life and social behaviors in the late nineteenth century as the comforts of home became a reality for suburban and rural Americans

Machine Learning for Healthcare Applications Sachi Nandan Mohanty,G. Nalinipriya,Om Prakash Jena,Achyuth Sarkar,2021-03-24 When considering the idea of using machine learning in healthcare it is a Herculean task to present the entire gamut of information in the field of intelligent systems It is therefore the objective of this book to keep the presentation narrow and intensive This approach is distinct from others in that it presents detailed computer simulations for all models presented with explanations of the program code It includes unique and distinctive chapters on disease diagnosis telemedicine medical imaging smart health monitoring social media healthcare and machine learning for COVID 19 These chapters help develop a clear understanding of the working of an algorithm while strengthening logical thinking In this environment answering a single question may require accessing several data sources and calling on sophisticated analysis tools While data integration is a dynamic research area in the database community the specific needs of research have led to the development of numerous middleware systems that provide seamless data access in a result driven environment Since this book is intended to be useful to a wide audience students researchers and scientists from both academia and industry may all benefit from this material It contains a comprehensive description of issues for healthcare data management and an overview of existing systems making it appropriate for introductory and instructional purposes Prerequisites are minimal the readers are expected to have basic knowledge of machine learning This book is divided into 22 real time innovative chapters which provide a variety of application examples in different domains These chapters illustrate why traditional approaches often fail to meet customers needs The presented approaches provide a comprehensive overview of current technology Each of these chapters which are written by the main inventors of the presented systems specifies requirements and provides a description of both the chosen approach and its implementation Because of the self contained nature of these chapters they may be read in any order Each of the chapters use various technical terms which involve expertise in machine learning and computer science
