Artificial Intelligence Research and Development

Teresa Alsina, Cèsar Fernández, Aïda Valls, 2021-11-15. Artificial intelligence has become an indispensable part of our lives in recent years, affecting all aspects from business and leisure to transport and health care. This book presents the proceedings of the 23rd edition of the International Conference of the Catalan Association for Artificial Intelligence (CCIA), an annual event that serves as a meeting point for researchers in Artificial Intelligence in the area of the Catalan-speaking territories and from around the world. The 2021 edition was held online as a virtual conference from 20-22 October 2021 due to the COVID-19 pandemic. The book contains 42 long papers and 9 short papers, carefully reviewed and selected. The papers cover all aspects of artificial intelligence and are divided under six section headings: combinatorial problem solving and logics for artificial intelligence, sentiment analysis and text analysis, data science and decision support systems, machine learning, computer vision, and explainability and argumentation. Abstracts of the 2 invited talks delivered at the conference by Prof. Patty Kostkova and Prof. João Marques Silva are also included. Offering a state-of-the-art overview of the subject from a regional perspective, the book will be of interest to all those working in the field of artificial intelligence.

High Performance Computing in Clouds

Edson Borin, Lúcia Maria A. Drummond, Jean-Luc Gaudiot, Alba Melo, Maicon Melo Alves, Philippe Olivier Alexandre Navaux, 2023-07-05. This book brings a thorough explanation on the path needed to use cloud computing technologies to run High Performance Computing (HPC) applications. Besides presenting the motivation behind moving HPC applications to the cloud, it covers both essential and advanced issues on this topic, such as deploying HPC applications and infrastructures.

designing cloud friendly HPC applications and optimizing a provisioned cloud infrastructure to run this family of applications. Additionally, this book also describes the best practices to maintain and keep running HPC applications in the cloud by employing fault tolerance techniques and avoiding resource wastage. To give practical meaning to topics covered in this book, it brings some case studies where HPC applications used in relevant scientific areas like Bioinformatics and Oil and Gas industry were moved to the cloud. Moreover, it also discusses how to train deep learning models in the cloud, elucidating the key components and aspects necessary to train these models via different types of services offered by cloud providers. Despite the vast bibliography about cloud computing and HPC, to the best of our knowledge, no existing manuscript has comprehensively covered these topics and discussed the steps, methods, and strategies to execute HPC applications in clouds. Therefore, we believe this title is useful for IT professionals and students and researchers interested in cutting edge technologies, concepts, and insights focusing on the use of cloud technologies to run HPC applications. **Computer Aided**

Verification Armin Biere, Roderick Bloem, 2014-06-28 This book constitutes the proceedings of the 26th International Conference on Computer Aided Verification CAV 2014 held as part of the Vienna Summer of Logic VSL 2014 in Vienna, Austria, in July 2014. The 46 regular papers and 11 short papers presented in this volume were carefully reviewed and selected from a total of 175 regular and 54 short paper submissions. The contributions are organized in topical sections: named software verification, automata, model checking and testing, biology and hybrid systems, games and synthesis, concurrency, SMT and theorem proving, bounds and termination, and abstraction. **Pattern Recognition** Michael

Goesele, Stefan Roth, Arjan Kuijper, Bernt Schiele, Konrad Schindler, 2010-09-17 On behalf of the organizing committee, we would like to welcome you to Darmstadt and DAGM 2010, the 32 Annual Symposium of the German Association for Pattern Recognition. The technical program covered all aspects of pattern recognition, and to name only a few areas, ranged from 3D reconstruction to object recognition and medical applications. The result is reflected in these proceedings, which contain the papers presented at DAGM 2010. Our call for papers resulted in 134 submissions from institutions in 21 countries. Each paper underwent a rigorous reviewing process and was assigned to at least three program committee members for review. The reviewing phase was followed by a discussion phase among the respective program committee members in order to suggest papers for acceptance. The final decision was taken during a program committee meeting held in Darmstadt, based on all reviews, the discussion results, and if necessary, additional reviewing. Based on this rigorous process, we selected a total of 57 papers corresponding to an acceptance rate of below 45%. Out of all accepted papers, 24 were chosen for oral and 33 for poster presentation. All accepted papers have been published in these proceedings and given the same number of pages. We would like to thank all members of the program committee as well as the external reviewers for their valuable and highly appreciated contribution to the community. **Secure Smart Embedded Devices, Platforms and Applications** Konstantinos
