Deconstructing Digital Capitalism and the Smart Society Mel van Elteren, 2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are

secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future

Natural Language Processing in Action, Second Edition Hobson Lane, Maria Dyshel, 2025-02-25 Develop your NLP skills from scratch with an open source toolbox of Python packages Transformers Hugging Face vector databases and your own Large Language Models Natural Language Processing in Action Second Edition has helped thousands of data scientists build machines that understand human language In this new and revised edition you ll discover state of the art Natural Language Processing NLP models like BERT and HuggingFace transformers popular open source frameworks for chatbots and more You ll create NLP tools that can detect fake news filter spam deliver exceptional search results and even build truthfulness and reasoning into Large Language Models LLMs In Natural Language Processing in Action Second Edition you will learn how to Process analyze understand and generate natural language text Build production quality NLP pipelines with spaCy Build neural networks for NLP using Pytorch BERT and GPT transformers for English composition writing code and even organizing your thoughts Create chatbots and other conversational AI agents In this new and revised edition you ll discover state of the art NLP models like BERT and HuggingFace transformers popular open source frameworks for chatbots and more Plus you ll discover vital skills and techniques for optimizing LLMs including conversational design and automating the trial and error of LLM interactions for effective and accurate results About the technology From nearly human chatbots to ultra personalized business reports to AI generated email news stories and novels natural language processing NLP has never been more powerful Groundbreaking advances in deep learning have made high quality open source models and powerful NLP tools like spaCy and PyTorch widely available and ready for production applications This book is your entrance ticket and backstage pass into the next generation of natural language processing About the book Natural Language Processing in Action Second Edition introduces the

foundational technologies and state of the art tools you'll need to write and publish NLP applications. You learn how to create custom models for search translation writing assistants and more without relying on big commercial foundation models. This fully updated second edition includes coverage of BERT, Hugging Face transformers, fine-tuning large language models and more. What's inside: NLP pipelines with spaCy, Neural networks with PyTorch, BERT and GPT transformers, Conversational design for chatbots. About the reader: For intermediate Python programmers familiar with deep learning basics. About the author: Hobson Lane is a data scientist and machine learning engineer with over twenty years of experience building autonomous systems and NLP pipelines. Maria Dyshel is a social entrepreneur and artificial intelligence expert and the CEO and cofounder of Tangible AI. Cole Howard and Hannes Max Hapke were co-authors of the first edition. [Hugging Face in Action](#) Wei-Meng Lee, 2025-11-11. Everything you need to know about using the tools, libraries and models at Hugging Face from transformers to RAG, LangChain and Gradio. Hugging Face in Action reveals how to get the absolute best out of everything Hugging Face from accessing state-of-the-art models to building intuitive frontends for AI apps. With Hugging Face in Action, you'll learn: Utilizing Hugging Face Transformers and Pipelines for NLP tasks; Applying Hugging Face techniques for Computer Vision projects; Manipulating Hugging Face Datasets for efficient data handling; Training Machine Learning models with AutoTrain functionality; Implementing AI agents for autonomous task execution; Developing LLM-based applications using LangChain and LlamaIndex; Constructing LangChain applications visually with LangFlow; Creating web-based user interfaces using Gradio; Building locally running LLM-based applications with GPT4ALL; Querying local data using Large Language Models. Want a cutting-edge transformer library? Hugging Face's open-source offering is best in class. Need somewhere to host your models? Hugging Face Spaces has you covered. Do your users need an intuitive frontend for your AI app? Hugging Face's Gradio library makes it easy to build UI using the Python skills you already have. In Hugging Face in Action, you'll learn how to take full advantage of all of Hugging Face's amazing features to quickly and reliably prototype and productionize AI applications. About the technology: Hugging Face is an incredible open-source ecosystem for AI engineers and data scientists, providing hundreds of pre-trained models, datasets, tools and libraries. It's also a central hub for collaborating on leading-edge AI research. Hugging Face is a massive platform, and this book will help you take full advantage of all it has to offer. About the book: Hugging Face in Action teaches you how to build end-to-end AI systems using resources from the Hugging Face community. In it, you'll create multiple projects including an object detection model, a RAG Q&A application, an LLM-powered chatbot and more. You'll appreciate the clear, accessible explanations along with thoughtful introductions to key technologies like LangChain, LlamaIndex and Gradio. What's inside: How to navigate the huge Hugging Face library of models and tools; How to run LLMs locally using GPT4ALL; How to create web-based user interfaces using Gradio; How to improve models using Hugging Face datasets. About the reader: For Python programmers familiar with NumPy and Pandas. No AI experience required. About the author: Wei-Meng Lee is a technologist and founder of Developer Learning.
