Top Movies Ideas Returns:

The Encyclopedia of Best Films Jay Robert Nash, 2019-10-23 This all inclusive A Z encyclopedia by one of the world's foremost experts on cinema provides comprehensive annotations of the best films produced from 1914 on. The work offers more than 5 000 three to five star entries: three stars good, four stars excellent, five stars masterpiece, and yes, author Jay Robert Nash has viewed every single one of them as well as many more that did not make the cut. In addition to a precis, each film's entry also includes a listing of the cast as well as the key principles involved in production from the director to the hair stylist. Especially unique to this book is a rating system that helps parents determine whether or not a film is appropriate for their children. Unlike the industry rating system which can be influenced by studio lobbying, Nash objectively evaluates each film and confers upon it one of four recommendations for viewing: recommended, acceptable, cautionary, and unacceptable. Backmatter includes a list of top films by genre: i.e. animated, drama, sports, mystery, adventure, etc. as well as an annotated name index listing all persons mentioned along with their dates of birth and death. Rounding out this essential volume for the film buff are over 500 still photos from the author's private collection.

100 Greatest Film Scores Matt Lawson, Laurence MacDonald, 2018-09-15 The background music on a film can make or break the audience experience. Imagine the shower scene in *Psycho* without the shrieking violins or *Jaws* without the ominous notes that portend the shark's attack. Musical accompaniment helps create atmosphere for the viewer from subtle undertones to compositions that heighten the drama. In *100 Greatest Film Scores*, authors Matt Lawson and Laurence E. MacDonald consider the finest music produced for cinema since the development of motion picture sound. Each entry includes background details about the film, biographical information about the composer, a concise analysis of the score, and a summary of the score's impact both within the film and on cinematic history. Among the many films cited here are iconic scores for *The Adventures of Robin Hood*, *A Beautiful Mind*, *The Big Country*, *Chariots of Fire*, *Citizen Kane*, *Edward Scissorhands*, *Fargo*, *Gone with the Wind*, *The Great Escape*, *Jurassic Park*, *King Kong*, *Lawrence of Arabia*, *The Lion in Winter*, *North by Northwest*, *On the Waterfront*, *Out of Africa*, *The Pink Panther*, *Raiders of the Lost Ark*, *Vertigo*, and *Up Arranged*, alphabetically and featuring a photo of each movie. The entries in this volume give the reader insight into how music functions across a wide spectrum of film genres. Representing some of the greatest composers in the history of cinema, including Elmer Bernstein, Bernard Herrmann, Alfred Newman, John Williams, and Hans Zimmer, *100 Greatest Film Scores* will be of interest to fans of movie music everywhere.

Rewatching on the Point of the Cinematic Index Allen H. Redmon, 2022-08-24 *Rewatching on the Point of the Cinematic Index* offers a reassessment of the cinematic index as it sits at the intersection of film studies, trauma studies, and adaptation studies. Author Allen H. Redmon argues that far too often scholars imagine the cinematic index to be nothing more than an acknowledgment that the lens-based camera captures and brings to the screen a reality that existed before the camera. When cinema's indexicality is so narrowly defined, the entire nature of film is called into question: the moment film no longer relies on a lens-based camera. The

presence of digital technologies seemingly strips cinema of its indexical standing This volume pushes for a broader understanding of the cinematic index by returning to the early discussions of the index in film studies and the more recent discussions of the index in other digital arts Bolstered by the insights these discussions can offer the volume looks to replace what might be best deemed a diminished concept of the cinematic index with a series of more complex cinematic indices the impoverished index the indefinite index the intertextual index and the imaginative index The central argument of this book is that these more complex indices encourage spectators to enter a process of ongoing adaptation of the reality they see on the screen and that it is on the point of these indices that the most significant instances of rewatching movies occur Examining such films as John Lee Hancock's *Saving Mr Banks* 2013 Richard Linklater's oeuvre Paul Greengrass's *United 93* 2006 Oliver Stone's *World Trade Center* 2006 Stephen Daldry's *Extremely Loud and Incredibly Close* 2011 and Christopher Nolan's *Dunkirk* 2017 *Inception* 2010 and *Memento* 2000 Redmon demonstrates that the cinematic index invites spectators to enter a process of ongoing adaptation
