Financial Aid Price:

The Price of Admission Thomas J. Kane, 2010-12-01 Over the past fifteen years a college education has become increasingly valuable in the labor market. As a result, the stakes have been raised in the debate over college admissions and student financial aid. With the gap in college enrollment widening by family income, the time has come to examine the strengths and weaknesses of the American system for financing higher education and to rethink its structure from the ground up. This book begins with an overview of the many indirect ways in which Americans pay for college as taxpayers, students, and parents, and describes the sometimes perverse ways in which state and federal financial aid policies interact. Thomas J. Kane evaluates alternative explanations for the rise in public and private college costs, weighing the role of federal financial aid policy, higher input costs, and competitive pressures on individual colleges. He analyzes how far we have come in ensuring access to all. Evidence suggests that large differences in college enrollment remain between high and low income students, even those with similar test scores and attending the same high schools. Kane promotes a package of reforms intended to squeeze more social bang from the many public bucks devoted to higher education. For example, he advocates front-loading the Pell grant program, limiting eligibility to those in their first two years of college, and providing a larger share of federal subsidies by assessing student resources after college rather than evaluating a single year of parents' income and assets before college. Copublished with the Russell Sage Foundation.

Paying the Price Sara Goldrick-Rab, 2016-09-01 A bracing and well-argued study of America's college debt crisis, necessary reading for anyone concerned about the fate of American higher education. College is far too expensive for many people today, and the confusing mix of federal, state, institutional, and private financial aid leaves countless students without the resources they need to pay for it. In *Paying the Price*, education scholar Sara Goldrick-Rab reveals the devastating effect of these shortfalls. Goldrick-Rab examines a study of 3,000 students who used the support of federal aid and Pell Grants to enroll in public colleges and universities in Wisconsin in 2008. Half the students in the study left college without a degree, while less than 20 percent finished within five years. The cause of their problems, time and again, was lack of money. Unable to afford tuition, books, and living expenses, they worked too many hours at outside jobs, dropped classes, took time off to save money, and even went without adequate food or housing. In many heartbreaking cases, they simply left school, not with a degree but with crippling debt. Goldrick-Rab combines that data with devastating stories of six individual students whose struggles make clear the human and financial costs of our convoluted financial aid policies. In the final section of the book, Goldrick-Rab offers a range of possible solutions, from technical improvements to the financial aid application process to a bold public sector-focused first-degree free program. Honestly, one of the most exciting books I've read because Goldrick-Rab has solutions. It's a manual that I'd recommend to anyone out there if you're a parent, if you're a teacher, if you're a student. Trevor Noah, *The Daily Show*.

Financial Aid and Loans for Students Crash Course

IntroBooks,2019-12-21 Different schools have different policies regarding how they offer financial aids to students A student seeking financial aid from any particular institution will therefore do well to stay abreast of information about that particular institution and its regulations regarding financial aid Each of these schools has different aims regarding how much of student financial needs they are willing to meet While some schools like Columbia University intend to meet 100% of the students needs financially some other schools go less Grants are given to students without repayment The amount of grant varies based on the level of education and also the complexity of the study work or project In the case of New York University for example grants provided only meet 68% of the student s needs this means the student may experience budget gap This same school gives most of its aids to its students in the form of loans which the student is expected to pay back after graduation Some conditions also determine how much of the student s needs the school can meet A student with solid academic performance for example can benefit from a higher percentage of financial aid compared to another student not having such performance Some other schools consider the financial strength of the student or that of his her parent when offering financial aids However a school like Columbia University mentioned earlier does not utilize such measure to determine who to give student loan and who not to give they give their students aids based on merit alone It translates to the fact that even Bill Gate s son can get student aid based on merit in this school There are several other schools in the same category some of such schools offering their students merit aid are Brown University Pomona College Amherst College Williams College Princeton University and Massachusetts Institute of Technology In calculating merit award the institutions concerned would consider the percentage discount off tuition Private colleges offer average tuition discount of 33 5% this means a student can end up paying only 19 650 if the actual tuition fee is 30 000 The cut represents 33 5% of the actual fee In public college on the other hand the student is given just 15% cut off the actual price When seeking for school financial aid the school can give the student verbal assurance but this is never enough The best guide a student can have regarding financial aids is the Common Data Set Each of the schools in the united states has a Common Data Set it is an amazing document more or less a treasure trove of statistics on the characteristics valued by the school in its application retention freshmen class profile and enrollment The document will equally show the number of students requiring financial aid from the institution concerned as well as the number of students that are given Furthermore the document reveals information about the percentage of student s needs the institution can meet how the awards are split between loans and grants as well as what average package is worth The student can easily search the major search engines for Common Data Set specific for any school The internet can reveal information about in house scholarship and college aids for easy access Such information can equally reveal if a student is qualified for financial aid or not Some schools like Baylor University provide scholarship calculator on their website which

helps the student check eligibility for any particular scholarship program related to the school Eligibility for any scholarship is usually determined by the class rank of the student as well as his her ACT or SAT score **The Bottom Line** Advisory Committee on Student Financial Assistance, 2011 In making decisions about college it is essential that students and parents focus on net price which is the dollar amount that must be paid after subtracting financial assistance from cost of attendance A net price calculator is one of two financial aid tools designed to provide students and parents with accurate and timely information about the net price of a particular college or type of college A well designed calculator can provide an early estimate of cost of attendance and financial aid long before application for admission A second tool a financial aid award letter provides a list of the financial aid an admitted student will likely receive once enrolled While used at different points in the decision making process these tools are often closely related from a student and parent perspective The closer a net price calculator approximates the dollar amounts that are likely to appear in the financial aid award letter issued once the student has been admitted the more useful it is in the decision making process In the Higher Education Opportunity Act of 2008 Congress included two new requirements aimed at ensuring students and parents are provided with the data they need to make sound decisions To ensure broad availability of net price calculators Congress directed the Department of Education to develop a template as guidance and required each institution to make its own version available on its website by fall 2011 To encourage greater standardization of financial aid award letters Congress also directed the Department to develop a model financial aid award letter as guidance for institutions On March 17 2011 the Advisory Committee held its spring hearing in Washington DC and devoted two panels to a discussion of issues associated with net price calculators and financial aid award letters The first panel included researchers and analysts the second panel included practitioners After providing background this report presents a transcript of those two panels highlighting notable passages Overall the following consensus emerged from the panel discussions 1 Students and parents need accurate and timely information about both college expenses and financial aid from middle school through college enrollment and persistence 2 The current status of financial aid award letters in particular the lack of comparability from institution to institution provides a cautionary tale for the future of net price calculators and 3 While net price calculators have the potential to be useful tools for students and parents they are likely to suffer from several limitations that warrant further examination Appended are 1 March 17 Hearing Panelists 2 ACSFA Advisory Committee on Student Financial Assistance Members 3 ACSFA Staff and 4 ACSFA Authorizing Legislation A list of resources is included
