governments responded to that threat Despite early warning signs governments failed to appreciate the trade offs required to respond to the pandemic Their approach at times intolerant of debate and ignorant of diversity served the interests of some over others Their response prioritized stability and containment enabling four in ten people to work from home disproportionately benefiting an educated middle class who profited further from soaring stock markets and housing prices Mental health issues spiked racialized people were much more likely to test positive for the virus those in low income sectors experienced unstable employment and lacked workplace safety protections the lives of low risk youth were in constant suspension and residents of some care homes were virtually abandoned Seized by Uncertainty studies the pandemic response through the contexts in which it emerged exposing uncomfortable truths about a fragmented society and governance problems that predated the threat
