Proceedings of the fourth Asia-Pacific Research in Social Sciences and Humanities, Arts and Humanities Stream (AHS-APRISH 2019) Shuri Mariasih Gietty Tambunan, 2023-05-27 This is an open access book According to Castells power now rests in networks the logic of the network is more powerful than the powers of the network quoted in Weber 2002 p 104 it is whether nation states or local communities are deeply affected especially by inclusion in and exclusion from the global networks that structure a various sectors in society at any level Thus it is also crucial look closely at exclusion from and inclusion in different kinds of social structures where connectivity and access to networks are essential being aware that people at the bottom are those who with nothing to offer the network are excluded Castells arguments shows us how the new forms of network society offer challenges in a way that despite the disappearance of conventional ties exploitation marginalization exclusion and differentiation remain In what follows scholarships are invited to build an academic discussion on characterizing the structure and dynamics of societies in the world of the twenty first century Thus scholar may come to look at the meaning of being in a network society by examining the role of network society within the complexity of socio cultural political and economic circumstances in strengthening the role of science in overcoming local national regional and global problems But scientific research is also required to identify a wide variety of solutions to societal problems enhanced by the network society which no longer relate solely to a particular discipline but are multi and trans disciplinary In addition recent research has changed the traditional role of academia demanding more collaboration in the production of science not only among universities but also among researchers social practitioners and policymakers Considering these issues the fourth Asia Pacific Research in Social Sciences and Humanities APRiSH will be hosted by the Faculty of Social and Political Sciences Universitas Indonesia FISIP UI in 2019 under the theme The Network Society Continuity and Change Scientific inputs from all parts of the world are welcome academically and practically Various perspectives based on mono disciplinary multi disciplinary or trans disciplinary research are expected to examine the problems and contribute to solutions

International Steam Engineer ,1924 Domestic Engineering and the Journal of Mechanical Contracting ,1922 An Analysis of Lucien Febvre's The Problem of Unbelief in the 16th Century Joseph Tandler, 2018-02-21 Febvre asked this core question in The Problem of Unbelief Could sixteenth century people hold religious views that were not those of official Church sanctioned Christianity or could they simply not believe at all The answer informed a wider debate on modern history particularly modern French history Did the religious attitudes of the Enlightenment and the twentieth century notably secularism and atheism first take root in the sixteenth century Could the spirit of scientific and rational inquiry of the twentieth century have begun with the rejection of God and Christianity by men such as Rabelais writing in his allegorical novel Gargantua and Pantagruel the work most often cited as a proto atheist text prior to Febvre s study The debate hinged on some key differences of interpretation Was Rabelais mocking the structures of the Christian Church in which case he might be anticlerical Was he mocking the Bible scriptures or Church doctrines in which case he might be anti

Christian Or was he mocking the very idea of God's existence in which case he might be an atheist The other great contribution that Febvre made to the study of history can be found not so much in the fine detail of this work as in the additions that he made to the historian's toolkit In this sense Febvre was highly creative indeed it can be argued that he ranks among the most creative of all historians He sought to move the study of history itself beyond its traditional focus on documentary records arguing instead that close analysis of language could open up a gateway into the ways in which people actually thought and to their subconscious minds This concept the focus on mentalities is core to the hugely influential approach of the Annales group of historians and it enabled a switch in the focus of much historical inquiry away from the study of elites and their deeds and towards new forms of broader social history Febvre also used techniques and models drawn from anthropology and sociology to create new ways of framing and answering questions further extending the range of problems that could be addressed by historians Working together with colleagues such as Marc Bloch his understanding of what constituted evidence and of the meanings that could be attributed to it radically redefined what history is and what it should aspire to be
