by Artificial Intelligence (Preparing Future Media Professionals for an AI-Integrated World) Prof. P. Sasikala, Benny Mathur, 2025-11-13 Social Media 2.0 Powered by Artificial Intelligence Preparing Future Media Professionals for an AI Integrated World is a comprehensive guide designed for students, educators and emerging professionals in the field of New Media Studies. In an era where social platforms are not just communication tools but intelligent ecosystems, this book explores how Artificial Intelligence is reshaping the way we create, share, consume and interpret content online. From AI powered content generation and recommendation systems to data analytics, automation and ethical implications, the book covers it all in a manner that is both academically grounded and practically applicable. Divided into three core sections, the first part lays the foundation by examining social media's evolution, platform dynamics, content planning and branding. The second part dives into the transformative role of AI, showcasing how machine intelligence is integrated into social platforms from chatbots and sentiment analysis to virtual influencers and personalized feeds. The third part is focused on the topic of social media for public relations and how public relations agency can leverage the power of social media. Developed with a special focus on the Indian digital landscape, this text bridges global trends with local relevance. Each chapter is enriched with case studies, key concepts, real world examples and reflective questions to encourage critical thinking and hands on learning. Whether you're a student beginning your journey in digital media or a teacher seeking structured content for your classroom, this book offers a future facing framework to navigate and lead in a media environment increasingly shaped by AI.

Transforming Cinema with Artificial Intelligence Kiliç, Uğur, 2024-12-13 Artificial intelligence transforms cinema, reshaping how films are created, produced and experienced by audiences. From enhancing visual effects and automating editing processes to creating realistic CGI characters and personalizing viewer recommendations, AI is revolutionizing every stage of filmmaking. Machine learning algorithms can analyze data to predict box office trends, optimize scripts and assist in storyline development. AI driven technologies like deepfake and voice synthesis push the boundaries of storytelling, offering filmmakers new creative possibilities but often raise ethical considerations. As AI continues to evolve further, research may impact the cinematic landscape, enhancing the artistic and business aspects of the industry. *Transforming Cinema with Artificial Intelligence* is a comprehensive examination of the various applications of AI technologies in the cinema industry. It covers AI's role in scriptwriting, shooting processes, post production, sound editing, film restoration and marketing strategies, and details how these technologies are integrated into the film industry and their impact on creative processes and audience experience. This book covers topics such as digital technology, image generation and user experience and is a useful resource for business owners, producers, computer engineers, academicians and researchers.
