TBG2025 ABM, Asia Bike Media ABM TBG2025 *Colombia: Request for an Arrangement Under the Flexible Credit Line and Cancellation of the Current Arrangement - Press Release; Staff Report; and Statement by the Executive Director for Colombia* International Monetary Fund. Western Hemisphere Dept., 2022-05-02 Colombia's very strong policy frameworks and comprehensive policy response to the pandemic have supported the economy's resilience. With stronger than expected growth last year, fiscal deficits and public debt are declining faster than anticipated, and the fiscal framework has been reactivated with a new fiscal rule and debt anchor. Further monetary policy tightening should drive inflation towards the central bank's inflation target by mid 2024. Successful credit support measures in the financial sector are being phased out, and as discussed in the recent FSAP, financial sector supervision and regulation have been enhanced since the previous staff assessment. Overall, the authorities remain committed to maintaining their very strong policy framework, as seen by steps taken to normalize policies from a crisis footing in the pandemic. Political assurances on policy continuity from the leading candidates provide a necessary safeguard for the proposed arrangement. **Nigeria** International Monetary Fund. African Dept., 2019-04-01 This Article IV Consultation highlights that Nigeria's economy is still recovering from the substantial terms of trade shock that triggered the 2016 recession. Persistent structural and policy challenges constrain growth to below the level needed to reduce vulnerabilities and improve development outcomes. With elections now complete, there is a greater chance for faster policy implementation. The authorities' Economic Recovery and Growth Plan priorities remain appropriate and should be urgently implemented. Revenue-based fiscal consolidation would be required to create space for higher capital and priority spending while improving spending efficiency and strengthening governance. A comprehensive package of urgent policy reforms is required to address vulnerabilities and raise growth over the medium term. The IMF staff suggested that strengthening banking sector resilience requires increasing capital buffers. This includes extending the no dividend distribution rule to all banks with high restructured loans. **Flexible Voluntary Contribution** Food and Agriculture Organization of the United Nations, 2023-12-14 The Flexible Voluntary Contribution (FVC) 2022 annual progress report captures the key achievements of the FVC both in terms of its role as a pooled fund for non-earmarked and softly earmarked contributions from resource partners and the implementation of development initiatives through FVC subprogrammes. The report provides a comprehensive understanding of the FVC's role within the Organization, the contribution of FVC-funded work to the achievements of FAO's four betters and their respective Programme Priority Areas (PPAs), and the future direction of the FVC based on experiences in 2022. The report comprises six sections: 1 Introduction, 2 Achievements of the FVC as a fund, 3 Achievements of FVC programmes, the four betters, 4 Key FVC principles, 5 Challenges and lessons learned, and 6 Conclusions and future actions. **Flexible Voluntary Contribution** FAO, 2024-11-20 The Flexible Voluntary Contribution (FVC) 2018-2023 terminal report captures the key achievements of the

FVC as a tool to mobilize flexible funding from partners and to support the implementation of work that contributes to FAO's four betters. This includes a detailed review of resource mobilization efforts during the reporting period as well as a thematic discussion of the contributions made to each of FAO's Programme Priority Areas through FVC subprogrammes. Holistic Admissions as a Global Phenomenon Michael N. Bastedo, 2025-11-27. This edited book brings together leading scholars to share ongoing research on the diffusion of holistic admissions practices around the world. Many countries have adopted holistic admissions practices and some have used them for incoming students for over two decades but these developments have been rarely noted in policy and media discussions about university admissions. Chapters in this volume explore the similar challenges global institutions face related to college access, admissions transparency and the potential for corruption and how their admissions practices affect equity access and student diversity. Translating a body of existing transnational research, this volume provides strategies that higher education scholars, policymakers and practitioners can use to improve admissions practices and policies in global contexts.

Flexible Automation and Intelligent Manufacturing: Establishing Bridges for More Sustainable Manufacturing Systems Francisco J. G. Silva, Luís Pinto Ferreira, José Carlos Sá, Maria Teresa Pereira, Carla M. A. Pinto, 2023-08-24. This book reports on cutting edge research and developments in manufacturing giving a special emphasis to solutions fostering automation, sustainability and health, safety and well being at work. Topics cover manufacturing process analysis and optimization, supply chain management, quality control as well as human factors and logistics. They highlight the role and advantages of intelligent systems and technologies, discussing current best practices and challenges to cope with in the near future. Based on proceedings of the 32nd edition of the International Conference on Flexible Automation and Intelligent Manufacturing (FAIM 2023) held on June 18-22, 2023 in Porto, Portugal, this second volume of a 2 volume set provides academics and professionals with extensive information on innovative strategies for industrial management in the era of industry 5.0.

Recycling of Flexible Plastic Packaging Michael Niaounakis, 2019-12-04. *Recycling of Flexible Plastic Packaging* presents thorough and detailed information on the management and recycling of flexible plastic packaging, focusing on the latest actual potential methods and techniques and offering actionable solutions that minimize waste and increase product efficiency and sustainability.
